

INDUSTRIAL SOLUTIONS

DEAD BLOW HAMMERS

BALL PEEN HAMMERS

APPLICATIONS: Most popular steel face hammer. This hammer is frequently selected to strike chisels and punches. Also used in numerous industrial maintenance applications.

SOFT FACE HAMMERS

APPLICATIONS: The soft faced hammers are preferred when machined surfaces and precision parts are involved or when marring a finish is undesirable.

Polished Steel Head

has a large tough striking surface and ideal "torpedo shaped" peening surface

Flared End

helps prevent the hammer from slipping

Head Allows For Angled Strikes

and cleans up well after use

Internal Steel Canister

with free flowing shot design delivers maximum dead blow action

Microcellular Grip

conforms to hand shape and dramatically reduces vibration

Thumb Rest

allows you to choke up in a tighter work area

Dual Face Drilling Hammer 32oz.

- Dead Blow Hammers deliver sustained impact and maximum striking force with almost no rebound
- Free-flowing steel head canister design improves dead blow action and reduces rebound

HSSD32

Ball Peen Hammer 40 oz.

- Polished steel peen and head for a smooth striking surface
- Wide flare at end of handle helps prevent hammer from slipping out of hand
- Materials resist most shop chemicals and are non-sparking

HBBD40

32 oz. Bronze Hammer

- Bronze faces are soft enough to "give" when contact is made with metal parts
- Ribbed, textured grip with energy absorbing microcellular material enhances comfort and reduces vibration
- Non-sparking, chemical resistant urethane covering

HBBT32

Soft Face Hammer Set

- Set of three includes 24 oz., 32 oz. and 48 oz.
- Soft Grip Handle with ribbed, textured elastomer grip prevents hand slippage
- Composite Handle Shank improves balance while defusing shock and dampening vibration
- Compact Head Design concentrates power delivery

HBFE103

SAFETY SLEDGE HAMMER

“NEW” safety sledge hammers feature a unique heat treating process which allows the face to mushroom safely and eliminate any chipping, cracking, or flying shrapnel from the hammer head. It also prevents wear around the handle to head joint keeping them solidly connected. The unbreakable handle is made with tempered steel, & surrounded by heavy-duty molded rubber. The comfort design handle absorbs shock, ensures comfort and has a slip-resistant grip. These units are available in a wide range of weights and handle lengths.
