ORDER: RADPLUS

Blue-Point

Quick Coolant Exchanger

Remove & refill coolant systems & perform a leak test
in just minutes

RADPLUS

Environmentally Attractive Contained System

- Reduces chance of spills
- Safely stores used coolant in a large 12 gallon (45.4 L) holding reservoir

Saves Time

- OEM technology
- Evacuates most systems in less than 3 minutes
- Refills most systems in seconds, larger systems in less than 2 minutes
- Eliminates need for burping and warm-up
- Uses patented vacuum technology (same as manufactures)

Simple & Fast Start-up

- Operates on shop air
- User friendly adapters & controls
- Connects to most engine cooling systems at radiator filler neck or reservoir
- No need to cut heater hoses or disconnect radiator hoses
- Easy to follow manual

Improve Service Work

- Reduce cross contamination possibility
- Reduce cleanup time
- Reuse extracted coolant or replace coolant

Specifications:

Height 50" (127 cm)
Width 19" (48 cm)
Length 20" (51 cm)
Weight 49 lbs (22.3 kg)
Air Requirement
..... 90 psi (4.2 cfm/6.26 bar)

WARNING

- Wear safety goggles.
