### 17 Head Positions

(U.S. Patent Number 5,419,221)

Change head from locked to unlocked position by simply pressing the spline mechanism.

### Patented Reverse Mechanism\*

(U.S. Patent Number 5,495,783)

Offers one-finger control and lets you know ON/OFF position at a glance. \* 3/8" &amp; 1/2" drive units only.

### Push/Pull Function

With head in unlocked position — a simple push/pull motion turns fastener quickly in tight access areas.

### 360° Crank Function

With head in unlocked position — a cranking motion may be used for speed ratcheting.

### Slim, Round Sealed Head

Gets in tight spots &amp; is virtually maintenance free. Permanent lubricant is sealed in. Dust, dirt, &amp; moisture are sealed out.

### Fine Ratcheting Action

Means minimal movement &amp; effort to catch the next tooth on the ratchet.

### Forged Head & Handle

Precision-forged for exceptional strength.
