# DIAGN⏻STIC FOCUS

MULTITASKING WITH ZEUS™ SERIES PLATFORMS

Using a Windows® based tool such as the ZEUS™ or VERUS™ series platforms, brings some additional benefits that allow you to multitask.

SPLIT SCREEN VIEW

Carry out a functional test and view the scope data all at the same time. This can be helpful when carrying out a functional test where you want to be able to see the functional test results AND the scope results all side by side. For example, when doing a Duty Cycle test.

SCOPE & FUNCTIONAL TEST

DUAL SCREEN DIAGNOSTICS

It's best practice to check both sides of the computer when completing your diagnosis, looking at both the input side and the scanner side. Being able view both scanner and scope data on screen at once is a great help and can speed up your diagnosis.
