# ONE SMALL LEAP FOR YOU. ONE GIANT LEAP FOR YOUR CAREER.

Imagine pulling an ABS code and instantly seeing the matching TSBs, relevant PIDs, and the exact functional tests you need—right there on your diagnostic scan tool. With the APOLLO™ Gen 4, that workflow isn't a wish. It's wireless reality.

## Modern Vehicles, Modern Challenges

Today's vehicles change faster than ever. New electronics, new communication protocols, new model-specific procedures—it's a constant evolution. To stay ahead, technicians need their skill—and a diagnostic tool that can compliment and assist their workflow: fast, accurate, and ready to guide you through increasingly complex diagnostics.

That's exactly where the APOLLO Gen 4 stands out.

## Built for the Way Techs Really Work

The APOLLO is built to support you from the moment you plug in. You get direct access to the exclusive Snap-on Fast-Track® Intelligent Diagnostics workflow. Designed to walk you through each step—no wasted clicks, no lost time, no guesswork. With the SureTrack® Top Repairs Graph you'll get engineer-verified information on what components fail at certain mileages.

It becomes your real-time decision-support system in the bay, giving you the confidence to complete repairs accurately and efficiently.

APOLLO also highlights:

- Relevant TSBs
- Out of range PIDs
- Required resets and functional tests

All based on the vehicle and code being worked on—so you always know what to do next.

## Wireless Freedom

Whether you're checking a sensor behind the wheel well, testing a module under the dash, or verifying a repair from inside the engine compartment, the APOLLO lets you move freely around the bay with powerful wireless connectivity.

No interruptions. Just continuous live data, functional tests, and guided steps exactly where you need them.

IDEAL FOR THE

# MAINTENANCE TECH

With exclusive SureTrack® verified repair information and comprehensive coverage for domestic and imported vehicles and motorcycles, SOLUS+ provides all the sophisticated features you need to handle a broad range of diagnostics — without the complex functions you don't.

Tasks requiring this level of scan tool:

- Alignment
- Brakes & battery servicing
- Oil Changes
- TPMS

# UP YOUR GAME

BY CHOOSING THE RIGHT TOOL FOR THE JOB

IDEAL FOR THE

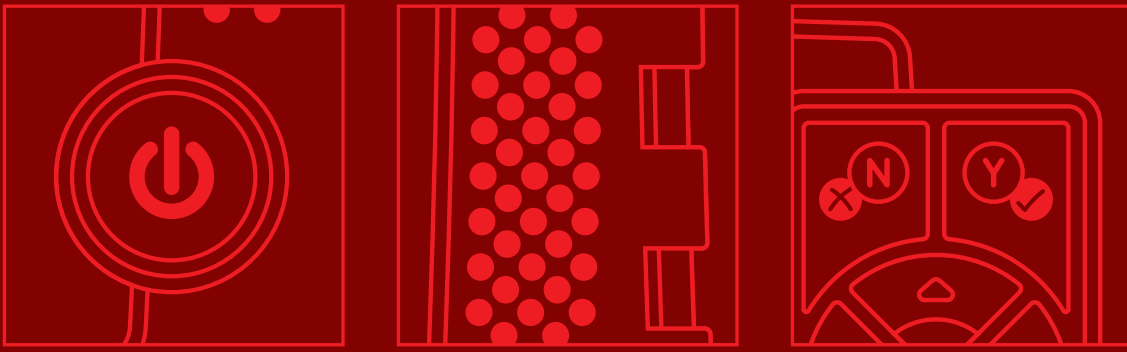

# YOUNG & HUNGRY TECH

Fast, intuitive access to diagnostic capabilities, renowned Snap-on quality and support, and the best OEM-specific coverage. High-end functions like one-touch all-system code scan, live data graphing, functional tests, auto-ID and custom configuration tools that help you get the job done.

Tasks requiring this level of scan tool:

- Pulling codes
- Resetting lights
- Brake & battery servicing

# SNAP-ON DIAGNOSTIC SOFTWARE SUPERIORITY COMES STANDARD.

Snap-on diagnostic tools are known the world over for great performance, rock-solid construction and intuitive design. But what truly makes them the best in the industry is what we put into them — both when they're built and over the life of every tool.

## THE INDUSTRY'S BEST, FROM STEP TO STEP

With more than four decades of experience and over one million scan tools sold, Snap-on proudly designs, engineers, manufactures and supports what we sell. Snap-on diagnostic software comes fully loaded with patented features to make your job faster, easier and more intuitive every day in the bay — plus affordable software options and world-class North America-based customer care.

- More vehicle coverage than any other diagnostic tool in the industry
- Manufacturer-level capabilities for codes, data and tests
- Consistent navigation and terminology across makes
- Advanced data graphing, and quick access to the most common specifications and reset procedures

## STAY UP TO DATE AND STAY ON TOP.

Check out some of the new coverage, tests, and tips in the latest release!

# SOFTWARE BUILT FOR THE WAY TECHS THINK.

Designed to help diagnose faster and with confidence by using engineer-verified, filtered data.

Ensuring your Diagnostic platform has access to the latest software available ensures you have access to what you need to keep you productive in the bay.

Our software offers more vehicle coverage than any other tool in the industry, along with unmatched breadth and depth in manufacturer-level capabilities for the codes, data, and tests you need.

## WHAT'S NEW?

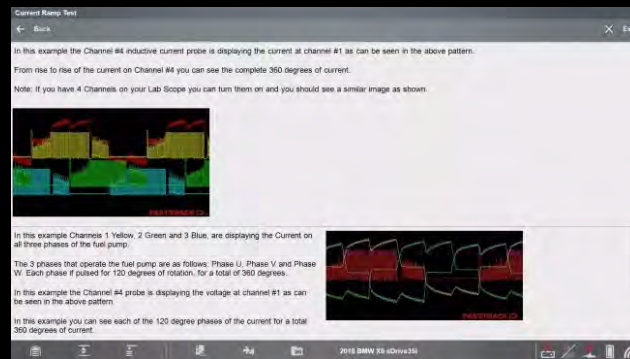

# COMPONENT TESTING MADE EASY

For many technicians, increasing electronic complexity in modern vehicles creates new challenges in component verification, signal interpretation, and confirming repairs when faults are intermittent or difficult to reproduce.

The latest release has:

- Expanded Guided Component Test coverage
- Enhanced visual waveforms
- FTID-supported workflows

This release also introduces enhanced Guided Component Tests for BMW® Variable Valve Timing position sensors on the 2013 BMW® 328i. These tests provide clear, step by step instructions along with five new full color waveform images, allowing technicians to visually confirm sensor operation and camshaft correlation.

Full-color waveform display for the 3-phase brushless fuel pump system on a 2018 BMW X6 sDrive35i.

# A TOOL FOR EVERY TECH

The ever-evolving automotive world has created the most challenging environment diagnostic professionals have ever faced. A Snap-on® scan tool streamlines your workflow, enhancing efficiency and boosting productivity on every repair. Each tool features the same software and usability, making it easy to upgrade whenever you're ready—without retraining.

Whatever your experience level, we have the right diagnostic scan tool to help you work smarter and elevate your expertise.

# WHY THE RIGHT INVESTMENTS CAN DELIVER BIG PAYOFFS

Learn how investing in a ZEUS+® can improve your shop's workflow and how you can get the most out of your investment.

Every shop owner's goals are to maximize every job that comes in the shop and turn it into profit. Not only does the repair need to be profitable, but it has to be efficient and accurate! That is why it is crucial to invest in the right tools that will give the best ROI alongside the proper team to ensure success. ZEUS+® is one of those tools that can deliver big payoffs for shops and technicians, its powerful features are designed to help the user complete a diagnosis without wasting time searching for answers or performing unnecessary tests or repairs.

Its modular 4-channel lab scope helps you verify faults across multiple vehicle systems and capture intermittent glitches, ensuring you can confirm every fix with confidence. We know information fixes cars, but it has to be the right information! Fast-Track® Intelligent Diagnostics provides filtered information to show only relevant data, SureTrack® provides real-world repair insights from billions of successful fixes, and Smart Data highlights only the PIDs that matter. Guided Component Tests give you vehicle-specific procedures for millions of components, showing you step-by-step how and where to connect, with known-good waveforms and expected results to speed verification.

The ZEUS+® also offers more vehicle coverage than any other diagnostic tool, consistent navigation across makes, advanced graphing, and quick access to common specs and reset procedures.

Paired with a fully mobile workstation—including integrated docking, monitor, keyboard, mouse, and optional organized storage—you can take your full diagnostic setup anywhere in the shop. And proudly show your customers that you are ready for any job!

## Did you know your Snap-on scan tool doubles as a classroom?

Whether you're on lunch break or have a few spare minutes, dive into on-demand training classes—5, 10, 15, or even 20 minutes long. This exclusive feature transforms your diagnostic platform into a learning hub at your fingertips.

**Simply navigate to the Top Level Menus and unlock a library of practical "how-to" classes covering real-world topics.**

But that's not all—**every week, we go LIVE** with industry training sessions to keep you ahead in the ever-changing automotive world. Got a Snap-on® scan tool? Perfect! Follow along with interactive walkthroughs that guide you through real systems and diagnostics. It's hands-on learning that turns complex tech into confidence and capability.

# DIAGNOSTIC ACCESSORIES

Adding a thermal imager or amp probe to your diagnostic process enables non-intrusive detection of issues, giving you a clear view of circuit or component performance without disassembly.

## PRECISION LOW AMP PROBE

EETA308D

- Performs precision testing of parasitic draw, injectors, pumps, relays and more
- Spring clamp operation can test wires up to 1/2" dia.
- Scale ranges: 20 and 60 A
- Resolution:  $\pm 1$  mA

## CLAMP-ON HIGH-CURRENT AMP PROBE

EETA502C

- Used with DMMs that have 2 V and 200 mV AC and DC ranges
- Range: 0–2,000 A AC or DC Scale ranges: 20 and 60 A Resolution:  $\pm 1$  mA

## DIAGNOSTIC THERMAL IMAGER+

EETH312A

- Detect problems all around the vehicle: brakes, heated seats, misfires, HVAC, worn bearings, belts, emission controls and many more
- Large 4.3" IPS color screen with 120 x 90 thermal sensor resolution
- Freeze function: Cursor moves the crosshair which enables multiple still images with temperature readings from five different points per image
- Thermal to standard image blending allows for easy identification and location of component or area being viewed

# IT'S A WEALTH OF INFORMATION RIGHT IN YOUR HANDS.

With a majority of semis traveling over 100,000 miles every year, your ability to properly maintain, diagnose, and repair them is as crucial as ever. **PRO-LINK+** is your team driver for truck diagnostics.

Snap-on® has united two of the industry's best – leading diagnostic coverage for Class 1 – 8 trucks integrated with code-specific repair guidance.

- 12" capacitive color touchscreen display for improved readability from any angle – and superior visibility indoors or out
- 9-Hour battery life
- Integrated camera with light
- Convenient wired or 5 GHz wireless compatibility
