

DIVE DEEP ON EVERY REPAIR.

INDUSTRY-LEADING
COVERAGE WITH FAST-TRACK[®]
TROUBLESHOOTING.

TRITON[™]

GEN3

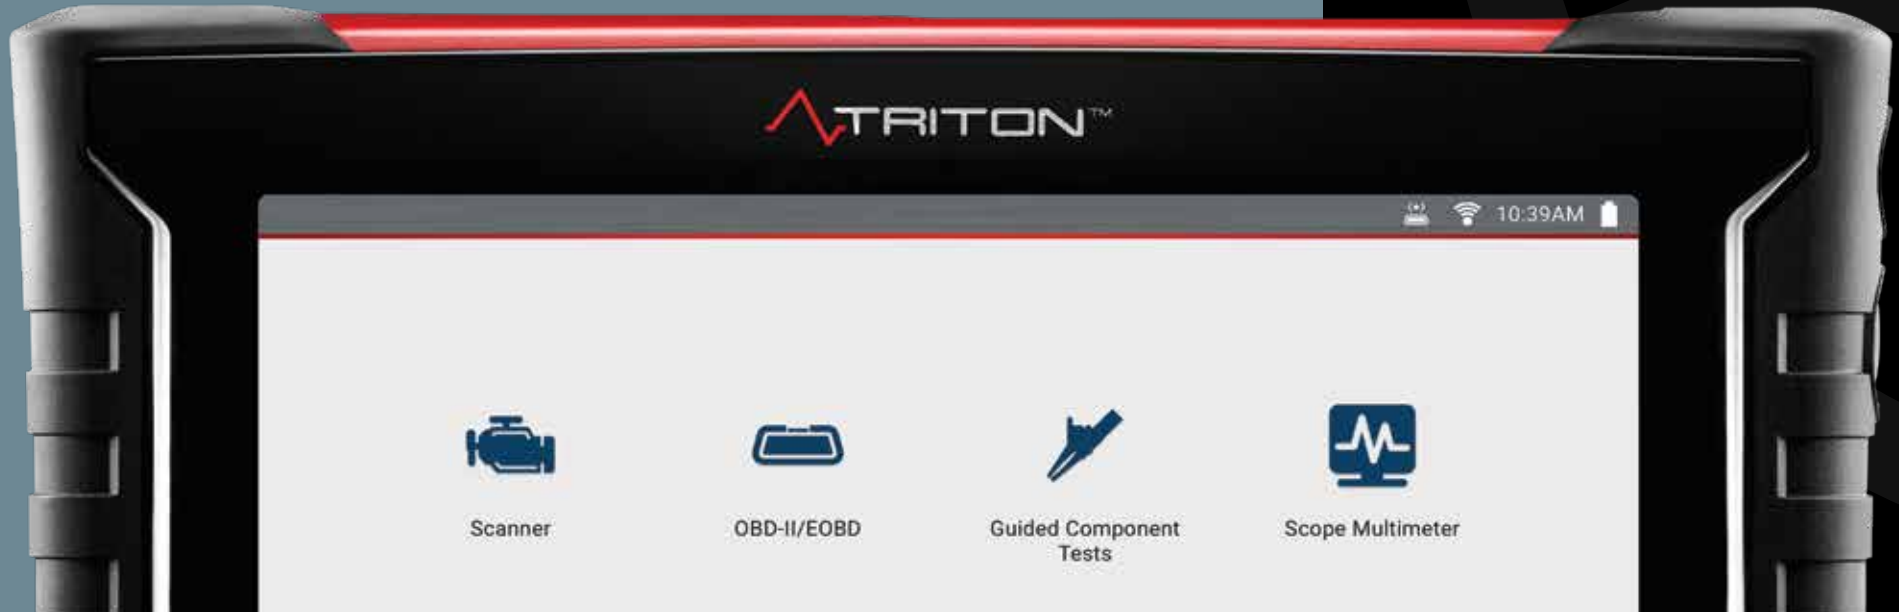

CAPABLE. CONFIDENT. DEFINITIVE.

The ever-evolving automotive world has created for diagnostic professionals what is now the most challenging environment ever seen. The third-generation **TRITON** streamlines your workflow, enhancing your efficiency and increasing your productivity on every repair. No more wondering where to start — just let **TRITON** take the lead, on everything from the everyday to the unusual.

TRITON sets you free, featuring wireless technology you can count on for a fast, reliable connection — along with Fast-Track Component Tests and code-based troubleshooting, a patented Snap-on® exclusive that filters out complexity and presents one focused workflow. Based on an ever-expanding and validated repository of billions of repair records and hundreds of billions of diagnostic sessions, our solutions are trusted and always growing, keeping you on the path to the right repair.

TRITON is at your side for every vehicle you see in your bay, ensuring you always have everything you need to get through the job at hand.

Snap-on is proud to be US born and bred, leading the world in the development and engineering of professional, high-grade automotive diagnostic products. More technicians depend on Snap-on than any other brand. As the diagnostic leader for nearly four decades, we're dedicated to supporting you and your success. For true professionals, it's Snap-on or nothing. So why would you reach for anything else?

CERTAINTY FROM START TO FINISH.

DIAGNOSTIC SOFTWARE

TRITON provides more coverage than any other diagnostic tool in the industry, with the breadth and depth of manufacturer-level capabilities for codes, data, and tests you need. Consistent navigation and terminology across makes, advanced data graphing, and quick access to the most common specs and capacities set Snap-on apart as the best-selling professional diagnostic system. You also get a complete vehicle scan function to quickly identify all codes for every system.

CUSTOM HARDWARE

TRITON is built to withstand the rigors of even the harshest work environments — because the automotive world is tough, and accidents are bound to happen. The sunlight-readable 10” touchscreen display is housed in a sleek, sophisticated design. Wireless connectivity gives you the freedom to work around the vehicle and shop. This is so much more than a generic tablet we put our logo on. Snap-on diagnostic products have a reputation for their longevity and durability.

EXPERIENCE-BASED SOFTWARE

TRITON features our exclusive Fast-Track troubleshooting functionality to streamline your workflow. The Top Repairs graph and verified Real Fixes show you how other techs have tackled the problem you’re facing. These verified fixes are harvested from billions of successful repair records. Our patented Smart Data automatically selects only the PIDs related to the code you are working on and flags which ones are out of range at idle. Instead of hundreds of possible readings, we only show you the ones that matter. In addition, pre-filtered functional tests and technical service bulletins (TSBs) help you confirm you’re on the right path to repair. **TRITON** also features a two-channel scope with Fast-Track Guided Component Tests, giving you all the information you need to test components. They show you step by step where to hook up, how to hook up, known good waveforms and much more — eliminating the guesswork and confirming the repair.

CUSTOMER SUPPORT

TRITON is backed by our industry-leading customer support, with US-based agents ready to provide invaluable assistance throughout your workday. Detailed online training is accessible 24/7, with live seminars and new product training from diagnostic experts — plus regular support from your Snap-on representative. We can even help with financing, offering flexible options to suit any budget and make **TRITON** affordable to diagnostic professionals at every level.

**ALL OF THESE THINGS COMBINED ENSURE YOU GET
THE MAXIMUM VALUE OUT OF YOUR INVESTMENT.**

THE FAST-TRACK[®] TO FIXED.

The Fast-Track troubleshooting workflow saves you time with every code by providing you with filtered information specific to the vehicle you're working on.

INTUITIVE WORKFLOW

The Fast-Track Intelligent Diagnostics landing page gives you a comprehensive view of a logical diagnostic workflow, guiding you through the repair you're working on and avoiding unnecessary steps along the way — all from a single screen.

THE INDUSTRY'S MOST COMPREHENSIVE SOURCE OF
EXPERT KNOWLEDGE FOR **PROFESSIONAL TECHNICIANS.**

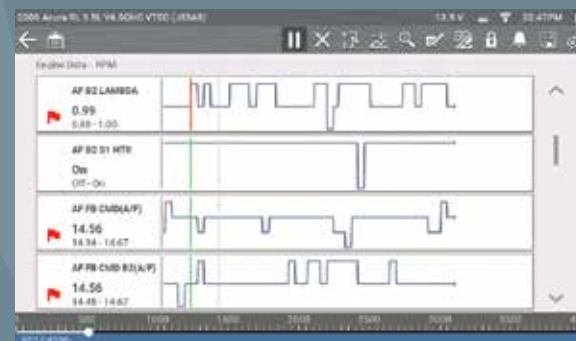

TOP REPAIRS GRAPH

Provides a graph by mileage of the parts and procedures used to fix the selected code or symptom, letting you see what has worked for others in that specific situation.

TECHNICAL BULLETINS

Gives you up-to-date, one-click access to relevant vehicle and code-specific OEM recalls, campaigns and bulletins.

SMART DATA

Delivers a code-based data list, highlighting PIDs that are out of expected range — with all the data recorded, all of the time.

RELIABLE

With proven results collected from billions of repair records and hundreds of billions of diagnostic sessions, our 'big data' puts vehicle-specific information right in front of you — eliminating the need to leave the bay and scour the web or forums in search of answers.

TRUSTED

Snap-on engineers verify all the information provided — so you can always be confident in the quality of data you're seeing.

CUTTING-EDGE

All information is continually updated and automatically synced to your tool via Wi-Fi®.

FUNCTIONAL TESTS AND RESETS

Supplies a pre-filtered list of functional tests and resets, letting you quickly test, verify and reset component operation.

REAL FIXES

Shows you what's worked for other technicians, based on expert knowledge from professionals who have seen — and solved — the same vehicle issues you're facing.

GUIDED COMPONENT TESTS

Vehicle-specific procedures for millions of components to verify the fix. See step by step where to hook up, how to hook up, known good waveforms and more.

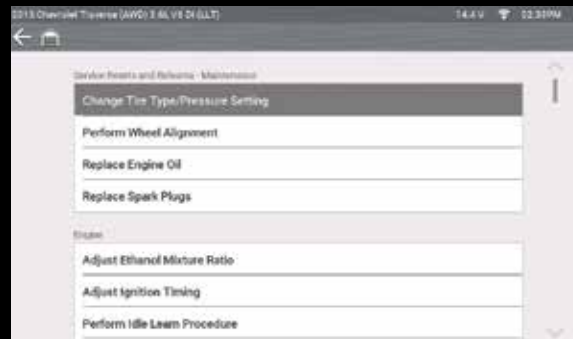

COMPLETE. DYNAMIC. COMPREHENSIVE

Snap-on exclusive advantages that give you a reason to connect to every vehicle in your bay.

COMPLETE CODE SCAN

Pre- and post-scan functions quickly identify all codes for every system. Reports are automatically saved and can be easily shared with customers.

SERVICE RESETS AND RELEARNS

Snap-on organizes tests and relearns by common repair procedure across all makes. Plus, a related repairs graph highlights other fixes that should be considered. OEM technical bulletins are also provided.

OIL SPECS AND RESETS

Quick access to detailed fluid specifications, capacities, important notes, and service interval resets.

SIVE.

TIRE AND WHEEL FITMENT

Comprehensive instructions for TPMS reset and replacement, tire fitment and torque specs.

TWO-CHANNEL LAB SCOPE

TRITON features a high-speed two-channel lab scope that displays live signals for two waveforms in real time for testing sensors, solenoids, injectors, charging/starting systems, ignition, motors, pumps, ABS and more. The powerful Peak Detect function grabs glitches, dropouts and ignition spikes so you can get to the root cause of the issue — with a sample rate of six megasamples per second that lets you capture high-speed details and faults other scopes miss.

Get assistance with pictures and text that help guide you to the best test locations and show easy access points for specific vehicles, all based on real-world technician experience. Reference waveforms and known good test values to compare good and bad results for a certain pass/fail diagnosis.

SCAN. SCOPE. SOLVE.

HARDWARE

- All-new sleek, sophisticated, streamlined design developed specifically for the shop environment — featuring thin, rugged grip handles and a lightweight body
- Wireless scan module for freedom to move around the bay
- 10" capacitive color touchscreen display for improved readability from any angle — and superior visibility indoors or out
- Fast boot up and one-touch code scan and clear, letting you move quickly from start to fixed
- Integrated two-channel lab scope with ample memory for verifying component failure and capturing intermittent glitches
 - Scale range: 0–100 mV to 0–400 V
 - Sweep rate: 50 microseconds to 20 seconds

DIAGNOSTIC SOFTWARE

- Comprehensive and detailed functional tests
- Fast-Track Guided Component Tests give you the information you need to test components. Showing you where and how to hook up and known good waveforms.
- OEM-specific scanner coverage for over 50 domestic, Asian, and European makes and more than 100 vehicle systems

EXPERIENCE-BASED INFORMATION

- Patented Fast-Track troubleshooting workflow, with filtered information and tests to bring focus to the specific vehicle and code you're working on
- Access to a patented repository for verified parts replacement records and Real Fixes harvested from billions of successful repairs
- Access to common procedures, specs and service interval resets
- Patented Smart Data, a code-based data list that flags parameters out of range

- Instant vehicle identification for most 2008 and newer vehicles
- OEM-level data and advanced graphing capabilities
- Up to eight live data parameters displayed on-screen at a time
- Records all data, all the time for easy switching to view any alternate PIDs
- One-click access to relevant vehicle- and code-specific technical service bulletins (TSBs)

FAST, RELIABLE

SUPPORT CAN'T

SUPPORT

When you choose the certainty and intelligence of the **TRITON**, you get the smartest and most responsive customer support in the industry to go right along with it.

CUSTOMER CARE

Our experienced US-based Customer Care Representatives are available at diagnostics_support@snapon.com and during business hours on our Customer Care Hotline at 800-424-7226.

TRAINING

ON OUR WEBSITE AND ON YOUTUBE™

We offer a wealth of product training available online to help you discover everything the **TRITON** can help you do. Find all this and more at diagnostics.snapon.com or on our YouTube channel @snapondiagnostics:

- Access our Knowledge Base for user guides, questions and answers
- See instructional videos from expert technicians to learn about the latest diagnostic techniques and how to take advantage of everything your **TRITON** has to offer
- Visit our Quick Tips playlist to see videos showing how the **TRITON** can help you diagnose and resolve specific vehicle issues
- **Weekly Live Training** sessions covering a variety of subjects designed to help build your diagnostic knowledge

PORT YOU TRUST.

GUIDANCE

Even the most experienced technician can run into a few questions every now and then. Your Snap-on sales representative is a one-on-one customer service advisor who can help you navigate any challenges that come your way.
