

SNAP-ON®

RESIDENTIAL ENERGY DIAGNOSTICS INSTRUMENTS KIT

This kit is designed to support Residential Heating, Ventilation, and Air Conditioning (HVAC) programs. The diagnostic instruments in this kit are **TOOLS FOR LIFE** required of technicians working in the advanced technologies needed to test, repair, and maintain residential HVAC systems.

The **Residential Energy Diagnostics Instruments** kit will allow participants the opportunity to prepare and operate specialized tools to test for ambient and surface temperature, pressure and vacuum. Classrooms and labs will have the latest technology required for testing residential HVAC systems.

KIT INCLUDES:

- Dual Port Digital Manometers
- Hot Wire and Vane Type Anemometers
- K-Type Thermocouple Test Clamps
- Clamp-on Multimeters
- Digital Psychrometers
- Manifold Gauge Sets

BUILDING TOOLS FOR LIFE

Snap-on also offers programs that provide students with certifications as proof of achievement in tool usage.

These NC3-backed, stackable credentials increase employment potential and on-the-job productivity in areas where professional technicians work in industry with certifications such as:

- Multimeter
- Mechanical & Electronic Torque
- Precision Measuring Instruments
- Automotive Scanner Diagnostics
- Diesel Scanner Diagnostics
- Wheel Service
- Building Performance Instruments
- Horticulture
- Tools@Height / Drop Prevention
- Precision Electrical Termination
- Structural and Sheet Metal Repair

Snap-on is a proud partner of the National Coalition of Certification Centers.
