In “Top Tools” News from Snap-on: Shop tools that allow techs to “see, hear and feel” the difference

KENOSHA, Wis. (Aug. 6, 2018) – Every job needs the right set of tools, and Snap-on has just what techs need to get the job done right. These “top tools” help make work easy, safe and comfortable.

Seeing is believing, and Snap-on has the tools techs need to see and troubleshoot problems with ease:

1. **BK6500 Video/Still Recording Digital Borescope**

Getting to the cause of mechanical problems often requires time-consuming disassembly—unless you have this digital borescope. With a 36" scope, it reaches into hidden spaces and records video or captures still images, while dual-imager lenses offer straight-ahead or 90-degree angle shots. The video scope features a LCD touchscreen for easy viewing and feature selection, a rechargeable lithium battery and internal memory storage space transferrable via SD card or USB.

2. **EEDMTACH1A Digital Contact/Non-contact Laser Tachometer**

This tachometer can measure up to 30,000 RPM at up to 25 feet away from its target, ideal for use on both vehicle components and industrial equipment. Its non-contact feature also works great in tight areas, keeping the user away from dangerous moving parts. Results are easy to read on the LCD color display, even in bright sunlight, and its memory recall brings back the last measurement on the display before powering off. The tachometer runs on standard 9V batteries.

3. **ECFBAR300 Rechargeable Shop Light (300 Lumens)**

A “use anywhere” light that works on the job or at home -- under hood, under car, in trunk or wherever additional lighting is needed. This rechargeable shop light provides 300 Lumen output and features a ratcheting hook for added flexibility. A two-position switch from high (three-hour run time) to low (six hour run time) extends the life of the tool’s 3.7V 2000 mAh Lithium Ion battery. Its rugged aluminum body adds durability. The light comes in four vibrant colors.

Sometimes it’s what you don’t hear that matters, and noise reduction is what these products are all about:

1. **SOVAC16 2-Stage 16-Gallon Wet/Dry Vac**

This vacuum features large capacity, rugged construction and excellent mobility for industrial and commercial use. Most notably, its 73 dB noise rating offers quieter operation while still boasting an 11 Amp, two-stage motor with 6 Peak HP for better airflow and suction. Designed to efficiently handle the toughest wet or dry worksite or shop clean-up tasks, the vac also features heavy-duty rear wheels and locking metal casters, a 10' crushproof industrial hose and a padded transport handle.

2. **GA3000B Headphone-Style Ear Protectors (Blue-Point®)**

These ear protectors are feather-light at only 1/2 lb, but effective with a 25 dB noise reduction rating. Adjustable to the individual user, its ABS plastic domes with PVC-covered ear cushions offer maximum comfort with powerful noise blocking performance.

More power doesn't have to mean less comfort. Snap-on continues to keep techs in mind with tools that feature ergonomic, soft-grip handles to temper the blow.

1. **PS4612 6" Low Vibration Orbital Palm Sander**

A soft, adjustable grip feels great in a PS4612 user's hand, while vibration is minimized with a robust front spindle and precision-balanced crank for smoother operation. The sander features a powerful .25 HP motor that delivers 12,000 RPM with unsurpassed control and comfort, and its O-ring-sealed motor extends longevity by preventing contamination.

2. **CDR8815DB 18 V 1/2" MonsterLithium Compact Cordless Drill**

Feel the difference in power and control – the 18 V 1/2" MonsterLithium Compact Cordless Drill features 500 in-lb of torque output for tough jobs and a two-speed gearbox to select the proper rotation speed. All of this with an oversize variable-speed trigger and 22-position clutch to increase precision and versatility, in addition to a single-sleeve steel chuck with carbide jaws to prevent the bit from slipping.

3. **PKNC300 3 pc Striking Scraper Set**

This durable set includes three thick, heavy-duty blades made of polished, high-carbon steel that feature ergonomic, soft-grip handles for a secure, more comfortable grip when striking. The versatile, dual-bevel designs support two distinct blade lengths and can be used as a chisel or scraper.

Customers can learn more about these tools and others that are available at special pricing now through the end of August, by contacting their participating Snap-on franchisee or other sales representative, visiting www.snapon.com or calling toll free 877-SNAPON-4 (877-762-7664).
