New Snap-on Website Videos Highlight Exceptional Coverage in Software Upgrade 17.4

LINCOLNSHIRE, IL, Jan. 18, 2018 – Snap-on® has added four new videos to its [website](http://diagnostics.snapon.com) that highlight exceptional coverage in Software Upgrade 17.4. Each video shows automotive repair professionals how their diagnostic tools can be enhanced and expanded to maximize their diagnostic capabilities when they upgrade to the latest software. The videos can be viewed at <http://diagnostics.snapon.com/17.4>.

The [videos](http://diagnostics.snapon.com/17.4) exemplify how updated software:

- Saves technicians time
- Solves customer problems by reprogramming fobs and keypads
- Allows technicians to diagnose complicated safety systems
- Gives technicians greater collision-related coverage

“Snap-on industry-leading diagnostic tools carry the most advanced software available, elevating the technician’s confidence to perform every general and collision repair job right, the first time, every time,” said Leian Wunderlich, software program manager, Snap-on Diagnostics. “Our new videos further illustrate how updating diagnostic tools to Software Upgrade 17.4 not only provides more coverage to take on the toughest jobs, but also guarantees that technicians have the most comprehensive diagnostic coverage in the industry.”

Additional reasons to upgrade to the latest software include: codes, data, functional tests, resets, adaptations, guided component tests, Auto ID, One-Touch Code Scan and Clear, on-tool training, plus verified common replacement parts and expert knowledge on tools with SureTrack®. Software Upgrade 17.4 offers access to over 4.9 million codes, tests, tips and data for 1981-2017 model years, with the most extensive coverage outside of the factory tool.

For more information about Software Upgrade 17.4 or available software programs, contact a participating Snap-on Franchisee or other sales representative, or visit <http://diagnostics.snapon.com/17.4>.
