New Hofmann monty 1675 Swing Arm Tire Changer Combines Speed, Versatility, Safety

Conway, AR – May 30, 2019 – Featuring a compact design and a quick and easy setup, the new Hofmann® monty® 1675 Swing Arm Tire Changer is ideal for handling passenger cars, light trucks and high-performance wheel and tire assemblies.

“The ergonomic design and safety-enhancing features of the new Hofmann 1675 tire changer provides the user a safe work space when changing a variety of tires,” said Adam Brown, director of product management for Hofmann. “The 1675 is easy to set up, simple to use and offers a large range of capacity.”

The [Hofmann swing-arm tire changer](#) features the patented smartSpeed™ technology which automatically minimizes risk of damage to tires. This innovative technology also optimizes the torque applied to the wheel and automatically sets the maximum rotation speed of the wheel. The 1675 offers variable speeds from seven to 18 RPMs for maximum productivity.

The *monty* 1675’s robust design, including precision-cast and machined shoes with strong cast jaws, makes for precise, slop-free clamping. The heavy-duty pneumatic valves are simple to operate and offer intuitive functionality. A powerful electric motor generates 1,200 Newton/meters (Nm) of torque to the table top to mount stiff, difficult tires.

Another unique feature of the *Hofmann monty 1675* is the newly designed bead breaker control that is simple to operate and prevents the technician from having to straddle the assembly during bead breaking. An integrated pressure limiter helps stop air flow once pressure has reached 55 PSI, preventing accidental tire over-inflation.

Customers can learn more about the *Hofmann monty 1675* Swing Arm Tire Changer and other wheel service products by calling 800-251-4500 or visiting www.hofmann-equipment.com.
