New John Bean T2545T Swing Arm Tire Changer Combines Speed, Versatility, Safety

Conway, AR – July 8, 2019 – Featuring a compact design and a quick and easy setup, the new John Bean® T2545T Swing Arm Tire Changer is ideal for handling passenger cars, light trucks and high-performance wheel and tire assemblies.

“The ergonomic design and safety-enhancing features of the new John Bean T2545T tire changer provide the user a safe work space when changing a variety of tires,” said Adam Brown, director of product management for John Bean. “The T2545T is easy to set up, simple to use and offers a large range of capacity. Its compact design gives it a small footprint, even with larger tire sizes.”

The *John Bean* [T2545T](#) Swing Arm Tire Changer features a locking mount/demount head offset. This feature offers maximum cosmetic safety for expensive wheels, significantly reducing the risk of harming wheel and tire assemblies. Its robust design, including precision-cast and machined shoes with robust cast jaws, makes for precise clamping. The heavy-duty pneumatic valves are simple to operate and offer intuitive functionality. A powerful electric motor generates 885 foot-pounds (ft-lb) of torque to the turntable to mount stiff, difficult tires.

Another unique feature of the *John Bean* T2545T is its newly designed bead breaker control, which is ergonomic to operate.

Customers can find out more about the new *John Bean* T2545T Swing Arm Tire Changer and other automotive wheel service and collision repair products by calling 877-482-4866 or visiting www.JohnBean.com.
