Snap-on Adds SOLUS Legend Training Modules to Website

LINCOLNSHIRE, Ill., April 13, 2020 – To help professional technicians navigate the features and functionality of the new SOLUS Legend™ diagnostic tool, Snap-on® has added ten Training Solutions videos to its website at <http://diagnostics.snapon.com/trainingsolutions> that can be viewed free-of-charge.

The Training Solutions videos teach technicians how they can get the most out of their SOLUS Legend diagnostic tool through short instructional sessions on specific topics, allowing them to quickly get answers on different aspects of tool operation. Topics include introduction and navigation, vehicle ID and scanner codes, quick lookups, motorcycle functions, functional tests and more. Visit the Snap-on [website](#) for a complete list of subjects.

Training Solutions videos provide quality product training that is available to technicians 24 hours-a-day, seven days-a-week, when it is most convenient for them. They can revisit the training sessions as often as necessary to learn at their own pace and comfort level.

SOLUS Legend offers sophisticated functionality, advanced graphing features, an intuitive user interface and user-customizable configuration. Technicians can take on more jobs with access to automotive coverage for 49 domestic, Asian and European vehicles as far back as 1980. It also includes comprehensive OEM-specific motorcycle coverage for nine domestic, Asian and European makes as far back as 2000. With a Wi-Fi connection and the current software upgrade, technicians can access SureTrack® vehicle-specific real fixes, repair tips and common replaced parts data harvested from millions of repair orders. One-touch code-scan and clear allows technicians to wrap up the job quickly.

To learn more about the SOLUS Legend, talk to a Snap-on representative or visit <http://diagnostics.snapon.com/soluslegend>.
