**Snap-on Introduces PRO-LINK® Edge**  
*Heavy-Duty Diagnostics for Trucks and Commercial Vehicles*

**ROCHESTER HILLS, Mich. (March 13, 2020)** – The new EEHD189090 PRO-LINK® Edge from Snap-on provides heavy-duty technicians the speed and efficiency required to stay competitive in today's commercial vehicle industry. The new PRO-LINK® Edge handheld diagnostic scan tool provides access to thousands of OEM tests, maintenance routines and programmable parameters all with an intuitive graphic user interface 10.1 inch Day-light Capacitive Touchscreen.

It includes enhanced diagnostic capabilities for major systems on commercial vehicles including engines, transmissions, brakes, body and chassis, even instrument clusters. Proprietary OEM faults and data come standard, eliminating the need to cross reference generic codes to OEM codes.

A wide range of coverage for the systems used by major OEMs are available including:

- Freightliner®
- International®
- Volvo®
- Mack®
- Paccar®
- Kenworth®
- Peterbilt®

In addition, new protocols are featured extending coverage to RAM® ProMaster and GM® body control modules.

The EEHD189090 introduces the new vehicle history feature that gives technicians a cumulative, diagnostic session history for every vehicle the tool has scanned. An added bonus is remote access capability with a direct line to the Snap-on heavy-duty technical support team making this a favorite among technicians. For even more support, an optional PRO-LINK® Edge Repair-Connect® subscription gives repair shops the ability to review and download maintenance information, wiring diagrams, specifications, digital photos and more.

Find out more about the EEHD189090 PRO-LINK® Edge, as well as other tools and products by contacting your participating Snap-on franchisee or other representative, visiting [www.snapon.com](http://www.snapon.com) or calling toll-free 877-SNAPON-4 (877-762-7664).
