Bigger screen and backlight choices make this next generation Snap-on digital multimeter a basic necessity for techs

Kenosha, WI (April 19, 2021) – The EEDM504F Basic Digital Multimeter TRMS is the third in our next generation Snap-on horizontal multimeter series. The new larger display reads easily with a quick backlight adjustment feature making it the best meter Snap-on has innovated for bright daylight use.

The EEDM504F taps into a wide range of electrical impulses necessary for diagnosing circuit or component issues. It assesses ohms, AC/DC volts, True-RMS AC, AC/DC amps, Hz frequency among other automotive electrical measurements. A record mode allows for the storage of minimum and maximum readings over a measurement period whether testing voltage or voltage drops, Ohms or resistance readings for circuits and components, or Hz for signal rates. Plus an industry leading 7-year limited warranty.

A convenient test lead storage wrap with retention strap, built-in tilt stand, and separate fuse/battery compartment for speedy replacements when needed make this multimeter an easy-to-use necessity for techs.

About Snap-on Tools

Snap-on Tools is a subsidiary of Snap-on Incorporated, a leading global innovator, manufacturer and marketer of tools, equipment, diagnostics, repair information and systems solutions for professional users performing critical tasks. Products and services include hand and power tools, tool storage, diagnostics software, information and management systems, shop equipment and other solutions for vehicle dealerships and repair centers, as well as for customers in industries, including aviation and aerospace, agriculture, construction, government and military, mining, natural resources, power generation and technical education. Snap-on Tools is one of the largest non-food franchise companies in the world, selling its products and services through franchisee, company-direct, distributor and internet channels.
