New John Bean Tru-Point ADAS Calibration Tool Debuts at Auto Glass Week in Orlando

Conway, AR – May 24, 2021 – The new John Bean® Tru-Point™ advanced driver assistance system (ADAS) calibration tool will be on display and available for demonstrations at the upcoming Auto Glass Week™ trade show (booth 212) held June 7-9 at the Orange County Convention Center in Orlando, Florida.

“We are excited to demonstrate Tru-Point firsthand. The innovative software technology allows for a single operator, saves time and eliminates the need for extra training,” said Mariana Montovaneli, director of marketing for John Bean. “We invite all Auto Glass Week attendees to stop by our booth and see how Tru-Point can help them improve shop productivity and profitability by adding ADAS calibration to the services they offer.”

John Bean Tru-Point is the only all-in-one solution that lets shops validate if vehicles meet OEM alignment specifications as well as proper target placement procedures. Simple, real-time and visual target placement instructions allow shops the ability to streamline the ADAS calibration process from beginning to end.

Auto Glass Week™ is the only event that offers the original equipment (OE) and aftermarket auto glass repair and replacement industry the opportunity to learn from peers and industry experts. Vendors, manufacturers, company owners and technicians join together at this international event each year. For more information, visit www.autoglassweek.com.

Customers can find out more about the new *John Bean Tru-Point* ADAS calibration tool by calling 877-482-4866 or visiting www.mytru-point.com.
