## **Snap-on Wins Two Professional Tool & Equipment News (PTEN) People's Choice Awards**

**LINCOLNSHIRE, Ill., Oct. 01, 2021** – Snap-on® has received two People's Choice Awards in the 2021 Professional Tool & Equipment News (PTEN) Innovation Award program. Snap-on was honored for its APOLLO-D<sub>9</sub>™ diagnostic scan tool and its ADAS Recalibration Report.

The new [APOLLO-D<sub>9</sub>™](#) diagnostic scan tool is designed and engineered for technicians. Get to work fast with a two-second boot-up and see the big picture with a nine-inch capacitive touchscreen display. Fast-Track® Intelligent Diagnostics simplifies workflow, providing filtered information relevant to the vehicle and code being worked on. Features include SureTrack® real fixes and top repairs, TSBs, Smart Data for relevant vehicle and code-specific PIDs with known good values, and common procedures, specs and service interval sets. An updated Ethernet cable connects to the latest protocols and automatic updates to the Snap-on cloud makes sharing pre- and post-scan reports simple.

The ADAS Recalibration Report supplies a summary of the work carried out by the technician, allowing them to give the next level of explanation to their customers and insurance companies. It identifies the vehicle, mileage, the system and date of recalibration. It also provides space to fill in input values and detailed results. Used with the Pre- and Post-scan reports, the ADAS recalibration report creates a holistic summary of the complete repair. The report is linked with the vehicle job so with the latest software and Wi-Fi, it can be synced to the Snap-on Cloud to share by text or email.

Readers of PTEN and Professional Distributor were invited to voice their opinions and vote on their top product entries nominated in the Innovation Awards program to be recognized as 2021 People's Choice Award winners.
