TRITON-D₁₀ Training Modules Added to Snap-on Website

LINCOLNSHIRE, Ill., May 6, 2021 – To help professional technicians navigate the features and functionality of the new TRITON-D₁₀[™] integrated diagnostic system, Snap-on[®] has added 11 Training Modules to its website at <http://diagnostics.snapon.com/trainingsolutions>.

The Training Modules teach technicians how they can get the most out of their [TRITON-D₁₀](#) tool through short instructional videos on specific topics, allowing them to quickly get answers on different aspects of tool operation. Topics include introduction and navigation, vehicle ID and scanner codes, Fast-Track[®] Intelligent Diagnostics, functional tests, global OBD II and more. Visit the Snap-on [website](#) for a complete list of subjects.

Training videos, which can be viewed free-of-charge, provide quality product training that is available to technicians 24 hours-a-day, seven days-a-week, when it is most convenient for them. They can revisit the training sessions as often as necessary to learn at their own pace and comfort level.

TRITON-D₁₀ is Ideal for the shop owner or general technician who needs scope functionality, verified testing and time saving features when troubleshooting that bring more certainty to every repair. The TRITON-D₁₀ lets them dig deep into the systems of a vehicle and evaluate performance with comparative data, systematically eliminating the unnecessary to provide them with only the specific resources that they need. Sophisticated, intuitive diagnostic testing and system verification, all from a single source for more all-around certainty, even on complex repairs.

To learn more about TRITON-D₁₀ or any of the Snap-on diagnostic solutions, talk to a participating Franchisee or other sales representative, or visit <http://diagnostics.snapon.com>.
