Snap-on Adds Quick-Release Mechanism to Stubby Ratchet Line-up

KENOSHA, Wis. (March 31, 2023) – Snap-on advanced its hand tool offering by adding a quick-release mechanism to the already popular 1/4" and 3/8" drive Dual 80[®] Technology stubby handle ratchets. With the new feature, technicians have a positive locking feature that holds sockets securely in place but easily decouples with a push of a button, even if oily from use and when working in tight places, the rugged reverse lever makes for a smooth change of direction.

With uncompromising strength and durability, the stubby handles, both regular and flex head variations, are small but mighty. They reach into the deepest, tightest places with seven teeth in contact with the gear. The 80-tooth ratchet design of the FRK80/FRKF80A and the 72-teeth design of the TRK72 and TRKF72 provide 5° of swing arc – requiring 25 percent less ratcheting arc needed to engage the next gear tooth. A contoured comfortable handle provides better control, and the sealed heads help maintain lubrication and protect against dirt and clogging in the gears. Keeping these long-lasting tools clean is easy thanks to the exterior chrome finish.
