Visit SUN Collision at FenderBender Management Conference

SAN DIEGO, Calif. – Sept. 12, 2023 – For those attending the FenderBender Management Conference, Sept. 24-26 in Aurora, Colorado, visit the SUN® Collision booth to learn how the latest enhancements to the SUN Collision Repair Information software can help technicians meet the challenges of repairing today’s complex vehicles.

“We look forward to participating in the upcoming FenderBender Management Conference and having the opportunity to talk with attendees about our latest developments, including our new repair package that helps automate the process of researching and producing blueprints for collision repairs,” said Chris Bonneau, SUN Collision business manager. “The new feature saves time and money for autobody shops while increasing accuracy of estimates.”

With just a few clicks, service writers and estimators can produce a comprehensive repair package that details all relevant information about a job, including repair procedures, illustrations and diagrams, as well as associated OEM part numbers. The feature provides documented support for insurance claims and limits liability for the shop.

Attendees will also learn how the SUN Collision software makes it easy to diagnose, repair and calibrate today’s advanced vehicles, including those equipped with Advanced Driver Assistance Systems (ADAS) that improve driver safety. With a quick link to ADAS information, the software provides the full picture of a vehicle’s ADAS features and components, including sensors, cameras and control modules, with clickable links to specific detailed repair and calibration information for that vehicle.

For more information on the FenderBender Management Conference or to register, visit: <https://www.fenderbenderconference.com/>.

ABOUT SUN

SUN® is a brand of Snap-on, Inc. SUN® Collision Repair Information provides complete, accurate data that collision repair facilities can trust to repair any vehicle, in any condition - inside and outside - with maximum efficiency.
