Optimize Vehicle Safety with New Cartec All-in-One Headlight Tester

Conway, AR – Dec. 16, 2024 – The new Cartec™ 433-HA headlight tester is an innovative tool capable of handling various light sources, including Halogen, Xenon and LED. Designed to meet the latest U.S. regulations, the 433-HA accommodates the needs of virtually any vehicle, from passenger cars and motorcycles to vans, trucks and buses.

Compatible with advanced systems such as Dynamic Light Assistance (DLA), Intelligent Light System (ILS) and Matrix technologies, the [Cartec 433-HA](#) provides comprehensive support for adjusting high beams, low beams and fog lights. Its all-encompassing capabilities make it a perfect solution for modern automotive lighting requirements.

Beyond its broad compatibility and support for cutting-edge technologies, the 433-HA is engineered to improve testing efficiency for users. The *Cartec* 433-HA features a touchscreen monitor for intuitive operation, a rechargeable battery for portability, a built-in printer for immediate documentation, an electronic level for precise adjustments and multi-bay functionality to enhance productivity in busy workshops.

“The user-friendly design of the Cartec 433-HA provides comprehensive support for a wide variety of headlight types, making it the ideal solution for modern automotive lighting requirements,” said Leandro Camargo, product manager for testing, Americas. “We recently showcased this versatile tool at SEMA, where it received overwhelmingly positive feedback for its ease of use and adaptability across a range of vehicle makes and models. It is an indispensable tool for any automotive service provider looking to deliver exceptional headlight aiming and maintenance services.”
