Challenger Lifts CL12A Heavy-Duty Two-Post Adjustable Lift Enhances Shop Performance, Efficiency

LOUISVILLE, Ky. – June 18, 2025 – The newly introduced CL12A 12K heavy-duty two-post adjustable lift from Challenger Lifts is a versatile, adaptable and powerful addition to any shop.

“Shops can experience the future of automotive lifting with the innovative CL12A 12K two-post lift,” said Trevor Coleman, national sales manager for Challenger Lifts. “Offering several unique features, the heavy-duty CL12A includes three stage arms that accommodate various vehicle types, while the undercar clearance is ideal for servicing electric vehicle batteries.”

The [CL12A](#) features multiple height and width adjustments, providing users with a variety of installation options to fit a shop’s unique layout and requirements. Whether working on cars, trucks, vans, SUVs or the latest electric vehicles, the CL12A is equipped to handle them efficiently in a single service bay.

With three-stage front and rear arms and premium telescoping footpads, the CL12A enhances shop service capabilities through improved performance and user-friendly operation. Stack adapter kits come standard to further increase versatility, allowing smooth adjustments for a wide range of vehicle lifting points.

For shops with limited space or ceiling height, the CL12A-LC is an exceptional choice. It retains all the core features of the standard CL12A with a reduced column height of 11 feet, 11 inches. Both the CL12A and CL12A-LC models are certified by the Automotive Lift Institute, indicating these lifts comply with the strictest industry safety and performance standards.

“When you choose Challenger Lifts, you are not just investing in equipment; you are investing in peace of mind and a commitment to excellence,” said Coleman “The CL12A is a perfect example of how Challenger Lifts deliver innovation and quality that help shops grow their businesses.”
