JOSAM Cam-Aligner Recognized with People's Choice Award

CONWAY, Ark. – Oct. 2, 2025 – The JOSAM® Cam-Aligner was recently recognized by Professional Tool & Equipment News (PTEN) with a People's Choice Award in the under vehicle equipment category. The Cam-Aligner also recently earned an Innovation Award from PTEN.

Unlike the PTEN Innovation Awards program where winners are determined by input from an expert panel of judges, the People's Choice Awards program allows readers of PTEN and users of vehicle repair equipment to decide which products take top honors. This award, chosen by readers and technicians across the industry, reflects the trust and enthusiasm of their customers.

"We want to thank the readers of PTEN for choosing the JOSAM Cam-Aligner as a People's Choice Award winner," said George Prokos, manager, North American sales, heavy duty for JOSAM. "This esteemed honor reinforces the positive feedback we receive from customers who tell us that the JOSAM Cam-Aligner helps improve shop productivity and profitability by enabling technicians to perform truck alignments more quickly and efficiently."

Extremely robust and flexible, the *JOSAM* [Cam-Aligner](#) allows users to measure a wide range of heavy-duty vehicles in varied environments, including uneven surfaces. With the optional inclinometer kit, the Cam-Aligner can compensate for floor unevenness and lifted axles. It can be used to align a variety of vehicles, including trucks with multiple steered axles, buses, light commercial vehicles, trailers and semi-trailers. Technicians typically can diagnose vehicles within minutes during routine maintenance and service checks.

To explore the full line of *JOSAM* equipment or inquire about becoming a distributor, call 800-225-5786 or visit www.josamna.com.

About JOSAM

JOSAM® is a global supplier of collision repair, wheel alignment and induction heating equipment for the truck and bus aftermarket. With over five decades of innovation, JOSAM® continues to provide premium quality solutions that help increase profitability for workshops and fleet owners.
