## **New John Bean Video Series Highlights ADAS Service and Repair Procedures for Rivian Electric Vehicles**

**Conway, Ark. – March 3, 2025** – John Bean has produced a new [series of videos](#) focusing on using the John Bean® Tru-Point™ advanced driver assistance system (ADAS) calibration tool for ADAS service and repair procedures for Rivian® electric vehicles. These videos highlight specific ADAS procedures for *Rivian*, including the wing, front camera, front radar and 360 procedures.

“Tru-Point is truly a difference maker for service providers who want to perform ADAS services efficiently and accurately,” said Jordan Krebs, product manager for alignment and ADAS, Americas. “The new video series, which are for demonstration purposes only as some procedures may change per OEM requirements, gives service providers a comprehensive overview of ADAS service procedures for Rivian electric vehicles.”

The *Tru-Point* calibration tool evaluates ADAS-related wheel alignment values and meticulously monitors each phase of the setup process, ensuring compliance with OEM safety standards before any ADAS calibration is performed. Using advanced camera technology, the system guarantees precise positioning and automatically adjusts based on the vehicle’s location. Additionally, it generates a detailed, user-friendly report that documents the technician’s completion of all necessary steps for accurate calibration.

The videos can be viewed on the *John Bean* YouTube channel (<https://www.youtube.com/@johnbeanequip>).

To learn more about the *John Bean Tru-Point* ADAS calibration tool and other *John Bean* products, visit <https://www.johnbean.com/us/adas-calibration-systems/tru-point/>.
