## **New Pro-Cut Adapter Guide App Helps Technicians Identify the Right Adapter in Seconds**

**WEST LEBANON, N.H. – Dec. 17, 2025** – The newly updated Pro-Cut™ adapter guide app is designed to help brake technicians quickly determine which Pro-Cut wheel adapters will fit the vehicle they are working on, regardless of world market.

“The goal of the Pro-Cut adapter guide app is to put accurate, up-to-date adapter information right in the technician’s hand,” said Jeff Hastings, president of Pro-Cut. “It eliminates the guesswork and speeds up service, no matter what vehicle rolls into the shop. By providing techs with quick, reliable information, brake service can be performed faster, easier and more efficiently.”

Information found in the *Pro-Cut* adapter app includes clear images, part numbers, color coding, pattern numbers, and bore diameters and depth. Using the search function, users will also find other useful wheel information like bolt patterns, hub diameters, stud or bolt thread sizes and pitches, and wheel bolt/nut torque specifications.

The app is available in both the [Android](#) or [Apple](#) app stores and is free of charge.

For more information about *Pro-Cut* and its award-winning products, contact your *Pro-Cut* representative or visit [info@ProCutUSA.com](mailto:info@ProCutUSA.com).
