Snap-on Adds MT2600 Training Modules to YouTube

LINCOLNSHIRE, Ill., Dec. 9, 2025 – With the recent introduction of the Snap-on® MT2600™ scan tool, 20 training modules have been added to the Snap-on Diagnostics [YouTube](#) channel to help professional technicians learn the features and functionality of the new tool, fast.

“Through a series of short instructional videos, technicians will learn how to get the most out their new MT2600 scan tool from the very start, potentially adding an immediate boost to their productivity and throughput,” said Helen Cox, marketing and client services director, Snap-on Diagnostics. “The training modules are available free of charge and can be viewed as often as necessary so technicians can learn at their own pace and comfort level.”

The MT2600 training modules cover topics including Getting started – Features and Controls, Vehicle Identification and System Selection, Performing a Code Scan, Scanner Data – Introduction, OBDII/EOBD Basics, Previous Vehicles and Data, Tools Function – Basic System Settings, Installing Software Updates and many more.

The [MT2600](#) is ideal for technicians who want reliable, key functionality from an affordable diagnostic tool. It features the same software and usability as the other platforms in the Snap-on Diagnostics family and is easy to trade up to a more advanced diagnostic tool when the technician is ready, without having to worry about retraining or losing their investment.

Providing coverage for more than 100 vehicle systems, the MT2600 offers new technologies such as TPMS, hybrid power, collision avoidance and steering angle sensors, plus extensive capabilities like code scanning, live data graphing, functional tests, and relearns and adaptations, giving technicians what they need to complete the jobs that others can’t even start.

Both English and Spanish language capabilities come standard on the MT2600. The switchable interface lets technicians work in the language they are most comfortable with and then switch to the other language when needed, such as working with customers or parts vendors who may need the translation.

For mor information on the MT2600 scan tool, talk to a Snap-on Franchisee or other sales representative or visit www.snapon.com/diagnostics.

About Snap-on:

Snap-on Incorporated is a leading global innovator, manufacturer, and marketer of tools, equipment, diagnostics, repair information and systems solutions for professional users performing critical tasks including those working in vehicle repair, aerospace, the military, natural resources, and manufacturing. From its founding in 1920, Snap-on has been recognized as the mark of the serious and the outward sign of the pride and dignity working men and women take in their professions. Products and services are sold through the company’s network of widely recognized franchisee vans, as well as through direct and distributor channels, under a variety of notable brands. The company also provides financing programs to facilitate the sales of its products and to support its franchise business. Snap-on, an S&P 500 company, generated sales of \$4.7 billion in 2024, and is headquartered in Kenosha, Wisconsin.
