Learn How Snap-on TSS Award-Winning Products Deliver Through Innovation at Automechanika

WINHÖRING, Germany – Aug. 26, 2026 – Snap-on® Total Shop Solutions (TSS)™ will showcase the engineering, quality and manufacturing excellence of its award-winning equipment at Automechanika, being held Sept. 8-12 at the Messe Frankfurt exhibition grounds. Industry-leading brands like Car-O-Liner®, Ecotechnics®, Hofmann®, John Bean®, JOSAM® and SUN® will be on display and in action at booth #A96 in Hall 8.

“Automechanika is an outstanding opportunity to meet with customers, interact with attendees and highlight the breadth of solutions TSS brings to the market,” said Mariana Montovaneli, director of marketing at Snap-on Equipment. “The Snap-on TSS booth is purposefully designed so attendees can look beyond the exterior of our products, see inside the equipment and better understand the engineering, quality standards and craftsmanship behind the TSS portfolio. As important, the open layout creates more opportunities for meaningful conversations with customers about their businesses and the challenges they face.”

Three TSS products will be available for on-site demonstrations, including the *John Bean* [Tru-Point™](#) advanced driver assistance system (ADAS) calibration solution and the *John Bean* [V4400 Commander®](#) wheel aligner, and the innovative *Car-O-Liner* [Car-O-Tronic®](#) measuring system.

The TSS booth will also feature products displayed in a way that allows attendees to see inside the equipment, including the *Car-O-Liner* CTR® 9 resistance spot welder, H4PRO mobile induction heater and the BenchRack™ Versa in-ground straightening system.

Also featured at booth #A96 will be the *Ecotechnics* ECO₂ R744 air conditioning service device, the *JOSAM* Cam-Aligner, as well as two *Hofmann* products: the geodyna® 8250-2p wheel balancer and the monty® T-Matic PRO tyre changer. Attendees will also be able to view the TSS TreadReader™ DriveOver tire inspection system, and four *SUN* products: the PDL 4200, PDL 7100 and PDL 8200 diagnostic scan tools, plus the ATF GearKare, an advanced automated station designed to flush and exchange automatic transmission fluid (ATF).

“We collaborate closely with customers to develop solutions that address the challenges they face every day while delivering measurable value to their businesses,” said Montovaneli. “Automechanika gives us the opportunity to show them firsthand how the Snap-on TSS family of brands continues to lead through innovation. We invite Automechanika attendees to visit booth #A96 to learn how Snap-on TSS products help shops improve efficiency, productivity and profitability.”

About Snap-on Total Shop Solutions

Snap-on Total Shop Solutions is a family of Snap-on brands that brings together best-in-class automotive repair products. From wheel balancers, wheel aligners and diagnostics to brake lathes, automotive lifts, and collision repair, Total Shop Solutions offers a broad range of innovative products to outfit your shop, floor to ceiling.
