## Challenger Lifts 6K Mid-Rise Portable Lift Delivers Power, Flexibility, Space-Saving Performance

LOUISVILLE, Ky. – June 3, 2026 – The Challenger Lifts™ 6K Portable Mid-Rise Lift (MR6) is designed to increase productivity in professional shops while remaining a favorite among off-road enthusiasts and shade tree mechanics.

“We designed the MR6 to be as adaptable as the people who use it,” said Trevor Coleman, national sales manager for Challenger Lifts. “From off-road builds to home garage projects and professional service bays, this lift delivers the performance, portability and reliability needed to take on any challenge.”

Engineered for flexibility, the [MR6](#) features a motor mounted to a heavy-duty tow dolly, allowing for easy portability and operation on concrete surfaces both indoors and outdoors. This innovative design helps maximize valuable shop space while supporting a wide range of service tasks, including brake work, tire changes and exterior detailing.

With a 6,000-lb. lifting capacity, the MR6 can service vehicles from compact passenger cars to light trucks. It includes both short and tall auxiliary adapters, enabling technicians to reach a broader range of vehicle lift points. Additional design elements, such as a sliding and rotating arm system with durable rubber pads and operating on 110 volt power, contribute to efficient vehicle positioning and secure lifting.

“The Challenger Lifts 6K Portable Mid-Rise Lift continues to stand out as a dependable solution across a variety of environments,” said Coleman. “The MR6 is engineered to deliver power, versatility and convenience, making it an essential addition for anyone looking to work smarter and more efficiently for a small investment.”
