Hofmann Armored Series Wheel Balancers: Ultimate Choice for Precision, Reliability, Versatility

CONWAY, Ark. – May 12, 2026 – Hofmann[®] Armored Series wheel balancers are engineered for high-volume shops that require precise performance, dependable operation and the flexibility to handle a diverse range of wheels.

The *Hofmann 2400P* is designed to be versatile, enabling it to work with both standard and electric vehicle wheels (EV-ready). It provides extra strength, speed, unparalleled accuracy and advanced features that consistently deliver. Boasting an industry-leading ergonomic design, the 2400P features a compact yet powerful framework that ensures maximum capability without occupying excessive space. The high-resolution touchscreen display and thoughtfully designed, intuitive interface help users effortlessly navigate the balancer.

Featuring streamlined weight placement, the Easyweight™ feature helps eliminate guesswork with a laser that pinpoints the exact location for weight application, ensuring proper balancing and accurate results. Additionally, the 2400P features automatic data entry that eliminates the need for manual input, automatically detects wheel dimensions and selects the appropriate balancing mode, weight type and weight position.

The *Hofmann 2300P* is a professional-grade balancer designed to deliver precise, efficient wheel balancing in high-volume automotive service environments. Built with a rugged, armored construction, it is engineered for durability and consistent performance under demanding shop conditions. The unit features an intuitive touchscreen interface paired with semi-automatic data entry, allowing technicians to quickly input measurements and streamline workflow.

Both the 2400P and 2300 feature the Power Clamp™ which utilizes advanced electromechanical technology incorporating a power clamping device that consistently and reliably secures the wheel with a constant force, ensuring exceptional accuracy and repeatable results every time.

“The 2400P and 2300P Hofmann Armored Series wheel balancers are meticulously engineered using robust steel to ensure unwavering strength, even in the most challenging conditions. They bring together EV-ready versatility, advanced automation and laser-guided accuracy to simplify the balancing process and reduce the potential for error,” said Leandro Camargo, product manager for *Hofmann*.
