Hofmann monty 3850 Tire Changer Redefines Efficiency for Heavy-Duty Tire Service

CONWAY, Ark. – April 29, 2026 – The Hofmann® monty® 3850 heavy-duty tire changer provides service professionals with a powerful and versatile solution designed to simplify and streamline heavy-duty tire service across a wide range of commercial vehicles.

“The Hofmann monty 3850 was designed to give technicians maximum control, safety and productivity when servicing heavy-duty tires,” said Leandro Camargo, product manager for *Hofmann*. “From its remote operation to its secure hydraulic chuck and patented tooling, this machine makes complex tire changes faster and easier and is an essential addition for any shop servicing heavy-duty vehicles.”

Engineered and manufactured to handle the demands of modern fleets, the [monty 3850](#) allows technicians to work with certainty on heavy-duty tube-style and tubeless tires commonly found on buses, tractor-trailers and other commercial vehicles. The machine also accommodates off-the-road (OTR) wheel assemblies up to 59 inches in maximum diameter, expanding service capabilities without compromising safety or efficiency.

A specialized remote control enables a single technician to oversee all tire-changing operations from a safe distance, improving workflow while reducing physical strain. At the core of the system is a self-centering, four-jaw, hydraulically operated chuck that grips wheels securely to help prevent accidental unclamping during service.

The *monty* 3850 also features an all-in-one, patented bead breaker and mount/demount head assembly, designed to enhance productivity and tackle even the most challenging tire applications with ease.

“With its robust design, advanced safety features and ability to handle a diverse range of tire and wheel assemblies, the monty 3850 sets a new standard for heavy-duty tire service equipment,” said Camargo.
