Pro-Cut Enhanced Adapter Search Feature Helps Technicians Identify the Right Wheel Adapter in Seconds

WEST LEBANON, N.H. – July 21, 2026 – The adapter search feature on the Pro-Cut™ website gives brake technicians a fast and reliable way to identify the correct wheel adapter for virtually any vehicle, regardless of its global market. Available through the *Pro-Cut* website, the search tool allows users to quickly search by vehicle year, make and model to determine the correct *Pro-Cut* hub adapter required for on-car brake lathe service.

“The goal of the Pro-Cut adapter search is to put accurate, up-to-date adapter information directly into the technician's hands,” said Bruce Prince, national sales manager, North America for Pro-Cut. “It eliminates the guesswork and helps shops complete brake service faster, regardless of the vehicle in the bay. By giving techs quick access to reliable adapter and wheel information, we can help them improve efficiency, reduce downtime and ensure the job is done right the first time.”

The [search tool](#) also provides valuable wheel and hub specifications, including bolt patterns, hub diameters, stud or bolt thread sizes and pitches, and factory wheel bolt/nut torque specifications. It also includes a visual reference to help technicians confirm they have selected the correct adapter before beginning brake service.

“Pro-Cut on-car brake lathes utilize precision hub adapters that mount directly to the vehicle's wheel hub. This ensures accurate rotor resurfacing while minimizing runout,” said Prince. “The updated search tool supports both standard and specialty Pro-Cut adapters used throughout the industry, making it an essential resource for independent repair shops, dealerships and fleet maintenance facilities. While Pro-Cut adapters are designed to be intuitive to identify and install, the Adapter Reference Guide eliminates the guesswork for new users by providing quick, accurate guidance on selecting and mounting the correct adapter for virtually any application.”

Pro-Cut offers the Adapter Guide app, which is available free of charge in both the [Apple App Store](#) and [Google Play Store](#).

To access the *Pro-Cut* adapter search feature, visit www.procutusa.com/adaptersearch.aspx. For more information about *Pro-Cut* and its award-winning products, contact a *Pro-Cut* representative or visit info@ProCutUSA.com.

About Pro-Cut Brake Solutions

Based in West Lebanon, New Hampshire, Pro-Cut International, LLC develops, manufactures and markets patented brake service equipment, including rotor matching systems, bench lathes and wheel handling solutions. These innovative products enhance shop efficiency, increase profitability and are required or recommended by many leading vehicle manufacturers in the world. Pro-Cut Brake Solutions is one of the many brands that Snap-on® offers its customers. Founded in 1920, Snap-on Incorporated is a \$4.7 billion, S&P 500 company headquartered in Kenosha, Wisconsin.
