Pro-Cut Expands 30-Year Partnership with Ford

Pro-Cut X1, X15 and X19 Brake Lathes Featured in Ford Pro-Elite Service Centers

WEST LEBANON, N.H. – Sept. 22, 2026 – The Pro-Cut™ X15 rotor matching system and the X19 cordless rotor matching system have been added as brake service products to the Ford Pro™ Elite Commercial service facilities. These two innovative on-car brake lathes join the award-winning *Pro-Cut* X1 heavy duty lathe as essential repair solutions as Ford expands its commercial service network.

"Pro-Cut has had a partnership with Ford for over 30 years, and Pro-Cut is a nine-time recipient of the Ford Rotunda Supplier award for outstanding field support," said Bruce Prince, national sales manager, North America for Pro-Cut. "As Ford Pro expands its network of dedicated truck and fleet service centers, Pro-Cut on-vehicle brake lathe technology has become essential equipment in these facilities."

[Ford Pro Elite Commercial Service facilities](#) focus on providing dedicated truck and fleet repair services for Ford vehicles and other OEM brands. The Ford Pro service facilities have service bays large enough to accommodate mobile service vans and even F-750 trucks.

These facilities are now equipped with a full range of on-vehicle brake solutions, including the [X15](#) rotor matching system, the [X19](#) cordless rotor matching system and the [X1](#) heavy duty lathe for super duty dual-wheel trucks and buses, from the E and F350 up through the F750. The X1 also works on most other truck brands up to Class 8. The new *Pro-Cut* adapter, the 50-3683, allows the X1 to service smaller bolt pattern vehicles, including F350 trucks and E350, E450 and E550 trucks, further extending the system's versatility across Ford's commercial lineup.

"Ford Pro facilities now utilizing the X1 brake lathe technology are achieving full return on their investment in approximately 20 axles, underscoring its value in high-volume commercial service environments," said Prince. "With this expanded lineup of products, Pro-Cut continues to give Ford Pro facilities the tools they need to keep commercial fleets on the road, reinforcing a partnership built over three decades of collaboration."
