Pro-Cut X15 Brake Lathe Honors U.S. 250th Anniversary

Commemorative X15 to Feature Patriotic Design, Plus \$1,776 Savings

WEST LEBANON, N.H. – June 29, 2026 – In celebration of America's 250th Anniversary, Pro-Cut™ is offering a commemorative X15 rotor matching system on-car brake lathe with a patriotic design and special savings of \$1,776 through July 31.

"The 250th Anniversary of the United States is a historic milestone, so we decided to honor it with a special edition of our flagship X15 brake lathe," said Bruce Prince, national sales manager-North America for Pro-Cut. "The commemorative X15 celebrates both the nation's spirit of innovation and the service professionals from coast to coast who keep American motorists on the road."

The *Pro-Cut X15* on-car brake lathe is the first rotor matching system to be driven by a 48-volt DC motor, allowing for smooth operation, tighter run-out tolerances and superior surface finishes. The all-new computer system on the X15 provides disc tracking, maintenance alerts and variable speed control.

"With the special commemorative discount \$1,776 off the MSRP price, the Pro-Cut X15 gives customers access to our most advanced brake lathe technology at an outstanding value," continued Prince. "With the Pro-Cut X15 On-Car Brake Lathe, repair shops can increase brake service revenue by enabling technicians to restore rotors to OEM specifications instead of replacing them unnecessarily. This improves brake job quality, extends rotor life, reduces repair costs for customers and provides a more affordable service option. At the same time, shops can maintain similar profit margins comparable to rotor replacement by generating labor revenue in place of a parts sale, creating value for both the customer and the business."
