SUN Collision and John Bean to Showcase ADAS Repairs at 2026 NORTHEAST Automotive Services Show

SAN DIEGO, Calif., March 10, 2026 – Auto collision repair professionals attending the 2026 NORTHEAST Automotive Services Show are invited to visit the SUN[®] Collision/John Bean[®] booth to preview live demos of OEM repair information and intelligent calibration equipment designed for today's complex advanced driver assistance systems (ADAS).

The companies, which are part of the Snap-on[®] Total Shop Solutions family of brands, will highlight how pairing SUN Collision Repair Information with the John Bean Tru-Point[™] ADAS calibration system delivers a complete, streamlined ADAS repair solution. Demos will take place at booths 120/122.

“ADAS-equipped vehicles rely on highly sophisticated sensor systems, and improper repairs lead to improper calibrations that pose significant safety risks,” said Chris Bonneau, business manager for SUN Collision. “By leveraging our OEM repair information and Tru-Point calibration technology, shops can address every aspect of ADAS repair, from accurate diagnostics and repair procedures to precise calibration, ensuring vehicles are restored to factory specifications safely and completely.”

Powered by 1Search[™] Plus technology, SUN Collision includes an ADAS quick links button that provides a consolidated table of vehicle-specific information, all through a single web-based login. With a few clicks, technicians can quickly access sensor locations, system diagnostics and step-by-step calibration procedures. The software also includes OEM repair and replacement instructions, torque specifications, alignment details and critical safety warnings.

Tru-Point leverages advanced camera technology, easy-to-place targets and intelligent software to quickly check for ADAS-related alignment values while ensuring OEM compliance. It eliminates the need for a perfectly level shop floor, allowing technicians to accurately position ADAS targets with confidence. Using high-resolution cameras, the system creates a precise 3D image of the vehicle and confirms alignment in under a minute.

As a special show offer, collision repair facilities that purchase a Tru-Point ADAS calibration system from John Bean will receive a complimentary two-month subscription to SUN Collision Repair Information.

The 2026 NORTHEAST Automotive Services Show will be held March 20–21 at the Meadowlands Exposition Center in New Jersey. It is the flagship event of the Alliance of Automotive Service Providers of New Jersey (AASP/N). For more information, visit [Home - AASP/NJ's NORTHEAST Show](#).

ABOUT SUN Collision

SUN® Collision Repair Information provides complete, accurate repair data that collision repair facilities can trust to repair any vehicle, in any condition, with maximum efficiency. Powered by an exclusive 1Search search engine, the software suite delivers OEM collision & mechanical repair information through a single login, helping technicians fix cars faster with more confidence. SUN Collision provides on-demand access to current repair specifications and procedures for all makes, including vehicles equipped with Advanced Driver Assistance Systems (ADAS). SUN is a brand of Snap-on, Inc. For information about SUN Collision and its products, call 877-840-1973 or visit suncollision.com.
