Snap-on Introduces the ZEUS+ Grab N' Go Workstation

LINCOLNSHIRE, Ill., Oct. 19, 2026 – Snap-on® introduces the ZEUS+® Grab N' Go workstation, a portable hard case designed to help technicians safely transport their ZEUS+ scan tool and accessories throughout the repair shop, from shop to shop or for roadside recovery — all in one convenient package.

“The new ZEUS+ Grab N' Go workstation makes it easy for technicians to safely move their equipment around the repair shop where a cart won't fit or take their scan tool and accessories on the road,” said Helen Cox, marketing and client services director, Snap-on Diagnostics. “It brings diagnostic capabilities together in a durable, mobile package to help technicians keep their equipment organized, protected and ready to go wherever the job takes them.”

The new [ZEUS+ Grab N' Go](#) features a rugged, heavy-duty custom case with two carry handles, a telescopic handle and wheels for easy mobility. The case also includes a built-in 22-inch touchscreen monitor and three PRO-FI® foam storage dividers. The foam inserts keep all the oscilloscope accessories needed to operate the ZEUS+ to its full capacity organized and protected. An additional foam insert between the scan tool and the monitor can also serve as a sunshade when working in direct sunlight.

With exclusive Fast-Track® Intelligent Diagnostics, ZEUS+ helps simplify the diagnostic workflow by guiding technicians through each step, from start to finish, with the information needed to diagnose, repair and manage vehicle issues while avoiding unnecessary steps. With its robust design, ZEUS+ offers an intuitive user experience, advanced hardware and communication tools to help technicians stay connected with online resources and to their customers. ZEUS+ increases efficiency by providing maximum functionality in a single diagnostic platform.
