The V4400 Commander® from John Bean® delivers fast, accurate wheel alignment through advanced wireless technology and a flexible dual-tower design. Its high-resolution cameras provide a wide, stable field of view without cross-camera alignment, supporting full drive-through layouts and a variety of vehicle lengths. Engineered for modern workshops, the system adapts easily to different bay setups and ensures precise results on everything from compact cars to long-wheelbase light commercial vehicles.

- Drive-through design
- Adjustable camera post
- D2 Max® Technology
- Fast compensation and optimised alignment flow
- Advanced notification system
- Audit mode
- Vehicle dimensions

# TEST LANE

## CONFIDENCE IN EVERY TEST

### CONNECTED ATL BRAKE TESTER AND DGA6000 EMISSIONS ANALYSER

A fully connected emissions and brake testing solution designed to simplify workflow, improve accuracy, and remove manual data entry steps. With guided software and a single integrated interface combining emissions, brake testing, and DVSA MTS, it streamlines the testing process from start to finish.

#### DGA6000 OPTIONS:

- Intuitive software with simple menu navigation and guided test procedures
- Wireless emissions modules eliminate the need to coil and unwind hoses
- Heated emissions modules ensure the system is always ready for immediate testing

#### BRAKE ROLLER OPTIONS:

- Class IV: 700 mm up to 4000 kg (800 kgf)
- Class VII: 1000 mm up to 6000 kg (1250 kgf)<sup>††</sup>
- Dimpled roller surface protects tyres and ensures consistent, repeatable wet/dry results
