**AUTOMATIC TRANSMISSION FLUID
SERVICE EQUIPMENT**

THE SUN® ATF GEARKARE AUTOMATIC TRANSMISSION FLUID SERVICE EQUIPMENT

Designed for workshops specialising in automatic transmission servicing. It ensures efficient transmission fluid exchange, helping to maintain gearbox performance and longevity. Regular fluid changes prevent contamination, reduce wear, and preserve transmission integrity. The ATF GearKare restores smooth gear shifts, improves fuel economy, and enhances transmission lifespan, offering high performance and reliability.

Changing motor oil is completely different from replacing lubricants in automatic transmissions. Whether it's a gearbox with a classic converter, double clutch, or other types, all automatic transmissions require a significant amount of lubricating fluid to function properly.

Failure to change transmission fluid on schedule can lead to serious issues. Contaminants like metal shavings can accumulate, clogging the system and causing lacquers and solid particles to reduce oil flow through the valve maze. This leads to premature wear on synchronisers, bearings, and gears, shortening the lifespan of the transmission. Additionally, viscosity degradation reduces overall power, compromising vehicle performance.

Regular automatic transmission maintenance is recommended every 40,000 - 50,000 miles to prevent malfunctions and component failure. The ATF GearKare helps prevent these issues by providing an efficient, automatic fluid exchange process that safeguards the transmission.

EASE OF USE

Workshops equipped with the ATF GEARKARE station can perform automatic gearbox maintenance through a simple, reliable, and automated process

IMPROVED PERFORMANCE

With regular maintenance and oil replacement, results are immediate: no more grinding gears, with restored power and peace of mind. Over time, expect improved fuel economy, enhanced transmission longevity, and increased reliability, all while maintaining high performance

AUTOMATED PROCESS

The oil replacement process is fully automatic. By starting the vehicle engine with the ATF GEARKARE connected to the gearbox, the two ultra-fine filters clean the circulating oil, removing all contaminants

NEW AND USED OIL TANKS

The new oil tank is designed to accommodate various sizes and multiple brands. Used oil is discharged using compressed air—clean, fast, and simple, with no pump, maintenance, or tank removal required

SMART-DRAIN SYSTEM

SMART-DRAIN accurately measures recovered oil, ensuring precise refill every time

PREVENTS OIL CONTAMINATION

Engineered to prevent contamination between new and used oil, this system guarantees optimal fluid replacement

INTUITIVE SOFTWARE

The user-friendly interface is easy to navigate and guides technicians through the entire service procedure. Supported by an extensive online database, updatable via Wi-Fi, provides oil specifications, connection points, and more...

EFFICIENT OIL TRANSFER

The high-flow gear pump ensures up to 9 litres of oil per minute for efficient fluid exchange

ACCURACY

A scale for the cleaner provides the highest accuracy and precision compared to other systems. Using a scale avoids the risk of the pump sucking in air while injecting additives and removes the constant need to purge the pump

• Smart-Drain System

• 2 large fine filters

• High quality connectors

• Touchscreen

ATF GEARKARE

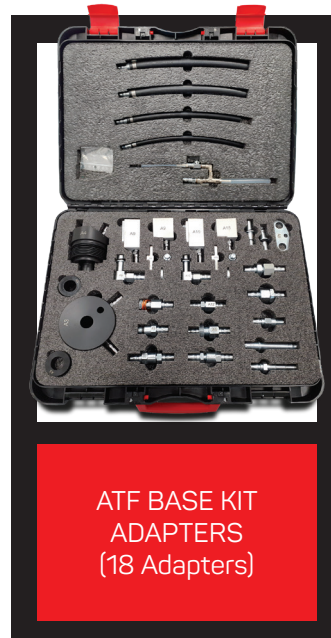

ATF ADAPTERS

A specialised range of ATF adapters has been developed to suit the European vehicle parc, ensuring comprehensive coverage for a wide variety of vehicles. This range continues to expand to meet the evolving needs of workshops.

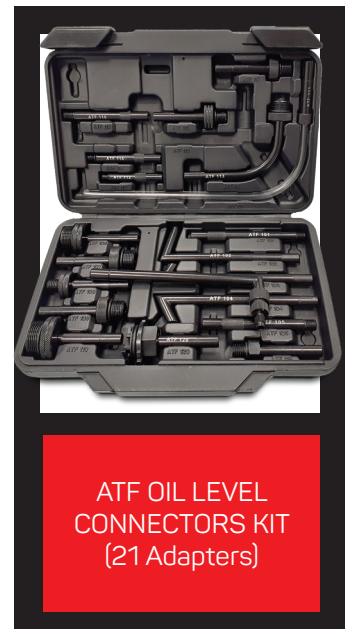

In addition to individual replacement adapters, specific adapter kits have been created to align with the typical vehicle mix and service volume of workshops. These kits streamline the purchasing process while ensuring a comprehensive selection of adapters for various workshop needs.

The ATF Base Kit and ATF Advanced Kit are supplied in dedicated storage cases for convenient organisation.

For more extensive storage of the full adapter range (Professional 1 or 2), a Storage Adapter Suitcase is also available, featuring compartments designed to securely house the complete selection. For the full list of ATF Kit Adapters, please visit the website.

ATF BASE KIT
ADAPTERS
(18 Adapters)

ATF OIL LEVEL
CONNECTORS KIT
(21 Adapters)

These kits provide a comprehensive solution for servicing the most frequently maintained automatic vehicles across Europe.
