

**WHERE CAN YOU FIND  
ALL THE ANSWERS  
TO MANAGE A JOB FROM  
START TO FINISH?**

**Snap-on**

THE THINKING IS IN YOUR HANDS.

**RIGHT AT YOUR  
FINGERTIPS.**

**PRESENTING VERUS.  
A POWERFUL EVOLUTION IN  
HANDHELD DIAGNOSTICS.**

**Snap-on**

THE THINKING IS IN YOUR HANDS.

VERUS is the first and only tool that gives you everything you need to manage the customer, the car, the diagnosis and repair in one rugged unit. With VERUS, you get the answers you need to fix it right the first time.

**VERUS™**

**The information sources you need, in one tool, at your fingertips.** Create customer records and vehicle history files. OEM-specific codes, data and functional tests for more than 30 vehicle makes. Over a million Troubleshooter time-saver tips based on real-world experience. More than 2 million component test procedures. Hotlinks to the complete Fast-Track® Reference Database, including TSBs, wiring diagrams, test procedures and more.

**The flexibility and multitasking of Windows XP.** Add Windows applications of your choice. Save and share test results, and create your own reference library on the 80GB hard drive. Wireless Internet capability for live access throughout the shop. Plug-and-play compatibility with monitors, USB printers, keyboards and more.

**A rugged handheld diagnostic tool with Internet access brings the world into your service bay.** An Internet browser to access online parts suppliers, e-mail, OEM sites and technical forums. ShopKey subscribers can view their complete repair information system on-screen alongside the Scantool, Scope or Meter. Compatible with J2534 pass-through devices for OEM-level reprogramming capability.

**Easy to view and navigate multiple applications at once on the huge 10.4" SVGA color LCD display.** Drop-down menus and a touchscreen gets you to results quickly. ID the vehicle once for all VERUS diagnostic applications. Go from customer records, to Scantool, to Component Test Meter to 4-Channel Lab Scope with one click, or to the Internet and your Windows applications.

**CREATED BY TECHS. FOR TECHS.**

Techs and shop owners from around the country helped build VERUS. In customer clinics and research groups, Snap-on got dozens of insights about most wanted designs and features. Techs told us what worked. What didn't work. And what could work better. The result is the first handheld diagnostic tool that works the way you do—because techs created it.

**TIME TO GET THE ANSWERS.**

Ask your Snap-on representative to put VERUS in your hands today. Once you see—and feel—the power, you'll know this is the only diagnostic tool you'll ever need. Check out the full specs and learn more right now at [www.diagnostics.snapon.com/verus](http://www.diagnostics.snapon.com/verus)
