## **Snap-on Adds New Harley-Davidson Key Fob Diagnostic Quick Tip Training Video**

**LINCOLNSHIRE, IL, Oct. 23, 2017** – Snap-on® has added a new Diagnostic Quick Tip training video to its [website](#) and [YouTube](#) channel showing professional technicians how to program a 2015 Harley-Davidson® Ultra Limited key fob using any of their Snap-on diagnostic scan tools.

“If a customer loses a key fob, it’s pretty inconvenient as it usually needs to be programmed to the vehicle,” said Helen Taylor, senior marketing manager, Snap-on Diagnostics. “In this new Diagnostic Quick Tip, our National Field Trainer Jason Gabrenas shows how to quickly and easily program a Harley-Davidson key fob using a scan tool.”

Diagnostic Quick Tips videos, based on real case studies, illustrate how to apply diagnostics to specific vehicles and applications through quick two-minute demonstrations of everyday problems that appear in the bay. All training videos are available at no charge 24 hours a day, seven days a week so technicians can watch when it is most convenient for them.

To find the Quick Tips on the Snap-on website, visit <http://diagnostics.snapon.com/TrainingSolutions> and select a diagnostic tool. Once a Quick Tip has been selected, technicians will see which diagnostic tools the tip applies to, read an overview of the problem and then watch the resolution video.

### **About Snap-on Diagnostics:**
