EMISSIONS

DGA6000 LINK CONNECTED EMISSIONS ANALYSER

The Sun® DGA6000 LINK has been engineered from start to finish to make your MOT testing process fast and reliable.

The system seamlessly integrates your MOT testing equipment with the DVSA's MOT Testing System (MTS) to reduce errors and make the entire process more efficient. Intuitive software guides technicians through the entire testing process, saving valuable time in training, setup and ongoing workload, everyday.

FEATURES

- **Connected:** Use as your DVSA MOT Testing System (MTS) device. Meets the latest regulations for connected MOT Testing to provide fast and accurate results
- **Wireless petrol and diesel modules:** The battery-powered petrol and diesel modules are wireless, eliminating the hassle of unwinding and coiling a long hose before and after each test. They are always heated and ready for measurement, improving the testing process
- **Ease of use:** The software interface guides technicians through testing procedures, plus the EOBD dongle makes oil and RPM measurements simple

- **ODB Health-check:** automatically identifies emissions-related pending codes during testing, use this feature to recommend repairs to your customers before they become a problem

BRAKE TESTING

CONNECTED ROLLER BRAKE TESTER

Sun® connected roller brake testers are engineered to improve the efficiency and accuracy of brake testing procedures and meet the demands of a busy testing station.

Engineered to meet the latest DVSA regulations for connected MOT testing, providing quick and accurate results, improving efficiency, eliminating data entry errors, and saving technicians valuable time.

FEATURES

- **Built to last:** The chassis is engineered from fully galvanised steel for durability and includes roller covers as standard. The roller brake surface includes a 10-year warranty, giving you long-term peace of mind
- **Accurate results:** The dimpled roller surface is designed to offer protection to tyres while giving a feel similar to the road surface, allowing for accurate and repeatable results wet or dry
- **Versatility:** Available in two roller configurations: 700mm rollers that have a drive over capacity of up to 4000 kg and can be used for MOT Class I, II, III and IV, or 1000mm rollers that have a drive capacity of up to 6000 kg and can be used for MOT class, I, II, III, IV, VL and VII (class I and II require optional adaptor plate)
- **Connected:** Approved for DVSA "connected" requirements: Connected MOT equipment is able to communicate directly with the DVSA's MOT Testing System (MTS) to improve testing accuracy and efficiency

AUTOMATED TESTING LANE

The Sun® ATL is a DVSA-approved automated test lane system for one-person operated MOT testing for class IV and VII (with optional class I and II upgrades available). At the heart of the Sun ATL is the DGA6000 LINK, which integrates all of your MOT testing equipment together with the DVSA's MOT Testing System (MTS) to reduce errors and make the entire process quicker and more efficient.

FEATURES

- **Connected:** Use as your DVSA MOT Testing System (MTS) device. Meets the latest regulations for connected MOT testing to eliminate data entry errors and provide fast and accurate results
- **User-friendly:** The workstation features intuitive software requiring minimal training, guiding technicians through the testing process simply and efficiently
- **Efficiency:** The Sun ATL has been engineered from start to finish to make your MOT testing process fast and reliable. By seamlessly integrating all your MOT testing equipment, it streamlines training, setup, and daily processes, saving technicians valuable time

- **Dual revenue capabilities:**
The four-post lift has integrated rear slip plates for wheel alignment procedures (alignment equipment is an optional upgrade)
- **Package includes**
 - 4-Post ATL Lift
 - DGA6000 LINK Emissions Analyser
 - Class IV or VII Connected Roller Brake Tester
 - Headlight Beam Tester
 - Jacking Beam - 2000kg or 2800kg

MOT TESTING

TYRE & WHEEL

START-UP PACKAGE

HIGH-VOLUME PACKAGE

WHEEL BALANCER AND TYRE CHANGER PACKAGES

Tyres and wheels undergo the most stress and require regular checks. Investing in professional wheel servicing equipment ensures garages can handle a wide range of tyres, including low-profile, run-flat, and even specialised tyres for EV and Hybrid vehicles. Precise wheel balancing ensures uniform rotation, preventing uneven wear, eliminating steering vibrations to improve driving comfort and prolong the life of tyres.

The Sun® range of professional wheel servicing equipment enables technicians to perform wheel services with maximum speed, precision and efficiency.

START-UP PACKAGE

- If you are looking to offer tyre and wheel services then the Sun® SWB100 Wheel Balancer and STC5305 Tyre Changer are the ideal package for general repair garages
- SWB100 Wheel Balancer
- STC5305 Tyre Changer

HIGH-VOLUME PACKAGE

- If you are looking to upgrade your wheel servicing equipment then the Sun® SWB340L Wheel Balancer and STC5545 Tyre Changer are the ideal combination for garages that service a greater volume of tyres every day
- SWB340L Wheel Balancer
- STC5545 Tyre Changer

SPEED. EFFICIENCY. PRECISION.

SVL-40S 4-POST SERVICE LIFT

The Sun® SVL-40S is an electro-hydraulic service lift with a rated lifting capacity of 4000 kg. Featuring a 4-post design, it is primarily designed for general repair workshops, providing a fast and efficient solution for lifting various vehicles from small cars to larger light commercial vehicles. This versatile lift enables technicians to accomplish a wide range of vehicle repair and servicing tasks with ease.

KEY FEATURES:

- **Versatility:** The main lifting platforms measure 4888mm by 630mm, with a 915mm opening, and can lift loads of up to 4000kg within a range of 180mm to 1830mm, which is ideal for a wide variety of general vehicle repairs and servicing tasks
- **Accessibility** Installed in a simple drive-on, reverse-off arrangement, and offered exclusively in a surface mount configuration. Includes low-angled surface run-up ramps, which are ideal for vehicles with lowered suspension

LIFTING

1: SSL-35 MOBILE MID-RISE SCISSOR LIFT

2: MCL1000 MOTORCYCLE SCISSOR LIFT

3: EV AND HYBRID BATTERY LIFT

1 SSL-35 MOBILE MID-RISE SCISSOR LIFT

The Sun® SSL-35 is a 3500 kg electro-hydraulic mid-rise scissor service lift, designed for use predominantly within tyre centres and small garages to lift cars and light commercial vehicles

KEY FEATURES:

- **Fully Mobile:** Small footprint and integrated mobility kit makes it possible to move the service lift to where it is needed in the workshop
- **Suitable for a wide variety of vehicles:** Rated maximum lifting capacity of 3500kg within a range of 110mm and 1000mm, ideal for both cars and light commercial vehicles
- **Safety systems include:** Pneumatic safety locking system, foot protection bar, hydraulic pressure overload protection system and a control unit that operates at 24V
- **Power ratings:** The 2.2kW motor operates from a single phase mains power supply

2 MCL1000 MOTORCYCLE SCISSOR LIFT

The Sun® MCL1000 is a heavy-duty scissor lift and workbench designed specifically for use with class I and II motorcycles up to 1000kg. Ideal for use in a multitude of workshop environments, and suitable for technicians working on anything from the smallest of scooters up to larger touring bikes

KEY FEATURES:

- **Heavy-duty:** Rated maximum lifting capacity of 1000kg within a range of 195mm-1200mm
- **Versatile:** Platforms with dimensions of 800mm by 2000mm can accommodate a variety of motorcycle sizes
- **Stability:** The adjustable wheel-clamping system allows motorcycles to be firmly secured onto the lift
- **Accessibility:** The low-angle ramp facilitates easy drive-on and roll-off. Hinged plates at front and rear allow for easy wheel maintenance and removal

3 EV AND HYBRID BATTERY LIFT

The Sun® Electric and Hybrid Vehicle Battery Lift is ideal for garages and repair centres that are accredited to service, repair, and replace battery systems on electric and hybrid vehicles

KEY FEATURES:

- **Fully mobile:** The small footprint and integrated wheels make manoeuvring the unit around the workshop simple and efficient
- **Precise positioning:** The suspended platform can tilt within a height of 40mm and the lower platform can move laterally within a distance of 20mm, which enables precise positioning when mounting and removing components
- **Versatile:** Rated maximum lifting capacity of 1200kg, the suspended platform can lift within a range of 800mm to 1810mm
- **Convenient Operation:** Handheld lift controls with down, stop, slow-rise and standard-rise functions

WHEEL ALIGNMENT

JohnBean

V2280 WHEEL ALIGNER

Get core wheel alignment functions quickly and easily with the John Bean® V2280. Featuring an automatic tracking beam camera, that significantly reduces beam adjustment time. The advanced notification system will compensate for almost any error made during the alignment in real-time, reducing incorrect alignment and provides the necessary steps for corrective action if needed.

FEATURES

- **Intuitive Software:** The simple instructional software was developed in collaboration with technicians and focuses on core alignment functions
- **Time-saving:** Automatic tracking camera beam moves up and down following the targets, saves time making beam adjustments
- **Intelligent and predictive alignment workflow:** The compensate, warn and alert system eliminates the guesswork and ensures a fast and reliable alignment process every time
- **EZ-Toe:** For easy and convenient adjustment at any steering angle, and eliminates the need for a steering wheel holder
