AIR CONDITIONING

KOOLKARE DUAL GAS 12

There is no need to take up valuable workshop space with two air-con machines when you can have one! The Sun KoolKare Dual Gas 12 is a fully automatic, air conditioning recovery and recycling machine which services both R134a and HFO1234yf gas vehicles. The automatic system saves time and boosts workshop productivity because the process can be started and left to run without additional technician input required.

FEATURES

■ **Two gasses one machine:**

You can service all AC systems using R134a or HFO1234yf gasses with a single machine, improving workshop efficiency and saving space

■ **Extensive database:** A comprehensive and fully updateable vehicle database ensures you can service every vehicle that comes into your workshop

■ **Refillable hermetically sealed bottles:** Eliminates moisture ingress and prevents oil and dye bottle contamination, to guarantee a quality air-conditioning service

■ **Integrated printer:** You have the option to print your test results using the inbuilt printer: This serves as proof of maintenance

THE KOOLKARE DUAL GAS 12 INCLUDES FREE STARTER KIT CONTAINING:

- Oil
- Ultra-violet dye
- Ultra-violet light
- Thermometer
- Safety goggles
- Gloves

JOHN BEAN V2000

The tablet controlled wheel alignment system that combines affordability with high performance. Its unique, space-saving design makes it an ideal choice for garages where space is at a premium, enabling them to perform wheel alignments in-house. The system's innovative, patented imaging technology provides uncompromised ease of use and confidence. The John Bean V2000 offers customers a complete 3D imaging experience, including fast-rolling run-out compensation, vehicle dimensions, and is less dependent on a lift.

FEATURES

- **Tablet Primary Display:** Easy-to-use tablet with a simple interface that clearly shows alignment flow for technicians of all skill levels
- **Quick and easy alignment process** – An intelligent workflow, intuitive software and cameras' lights quickly guide the technician through the complete alignment process
- **Perfect alignment every time** – High-speed cameras continuously monitor critical information and alert the technician with the required corrective actions
- **EZ-Toe:** For easy and convenient adjustment at any steering angle, and eliminates the need for a steering wheel holder

**AFFORDABLE, FAST
AND ACCURATE

SUN TWO POST BASELESS LIFT

The Sun SVL HBL maximises floorspace to provide excellent access for battery lifting systems used for mounting and removing batteries from electric and hybrid vehicles as well as lifting systems for mounting and removing engine, gearbox, drive axle, fuel tank, and suspension components on internal combustion powered vehicles. Available in two lifting configurations; SVL43 HBL (4-tonne) and SVL50 HBL (5-tonne).

FEATURES

- **Efficiency:** Suited perfectly to workshops that require a clear floorspace to remove and mount batteries from electric and hybrid vehicles
- **Stability:** The SVL43 HBL (4-tonne) features four arms with a three-stage asymmetric configuration which gives a better centre of gravity on heavier EV's and front-wheel drive vehicles
The SVL50 HBL (5-tonne) features four lifting arms with a three-stage symmetric configuration which gives a better centre of gravity when working on light commercial vehicles
- **Versatility:** With a pad height of 85mm, the SVL43 HBL's low profile arms are specifically engineered to elevate sports cars and vehicles with low skirts (SVL43 HBL only)
The SVL series is supplied with lifting adaptors, with the SVL43 HBL model featuring 55mm adaptors, and the SVL50 HBL model featuring 100mm adaptors
- **Symmetric posts:** The lift can be easily configured with the controls on either side due its symmetric design

ADAS

EZ-ADAS RECALIBRATION SYSTEM

Advanced Driver Assistance Systems (ADAS), commonly referred to as drivers' aids or safety systems, are not coming — they are already here. ADAS creates new challenges for repair centres of all kinds. Even seemingly simple repairs can result in the need for sensor recalibration. We can make it easier for you. The Sun® EZ-ADAS Recalibration System is an innovative collection of precision tools with cutting-edge design. The system features a unique, fast and precise centerline setup, based on OEM procedures, for easy operation. Intuitive laser-guided target placement ensures accurate, error-free positioning to increase productivity.

FEATURES

- **Simple:** EZ-ADAS has been developed to minimise the repair complexity by reducing the number of recalibration alignment components previously required
- **Precise:** EZ-ADAS is designed to reduce errors in the recalibration process. Our high-accuracy laser positioning and unique target placement helps technicians place targets to quickly and efficiently get customers back on the road
- **OEM Procedures:** We've taken the time to understand the OEM procedures so you don't have to. Exclusive access to the EZ ADAS app which provides step-by-step video target placement guides and data for each and every vehicle you are working on to avoid uncertainty
- **EZ ADAS App:** Exclusive access to step-by-step instructional videos and data you need to complete the job right the first time.
