

The VERUS EDGE and ZEUS diagnostic tools use Windows[®] 7 embedded system software. Wi-Fi connection is controlled through the Windows operating system.

The Wi-Fi connection instructions shown here are intended for quick reference only. For Wi-Fi related instructions / troubleshooting that are outside the scope of these instructions, visit Windows online support.

Wi-Fi connection allows you to:

- Access the Internet using the Windows web browser.
- Use built-in ShopStream Diagnostic Suite Repair Information applications (e.g. Intelligent Diagnostics, SureTrack[®], Tire and Wheel Service, TSBs, Oil Specs and Resets, etc). **Note:** *Repair Information applications are not available on all models, are optional and vary by model.*
- Receive diagnostic software updates
- Receive important product messages.

Connecting to Wi-Fi

Note: *Whenever the diagnostic tool is turned on, Wi-Fi will automatically try to connect to a network.*

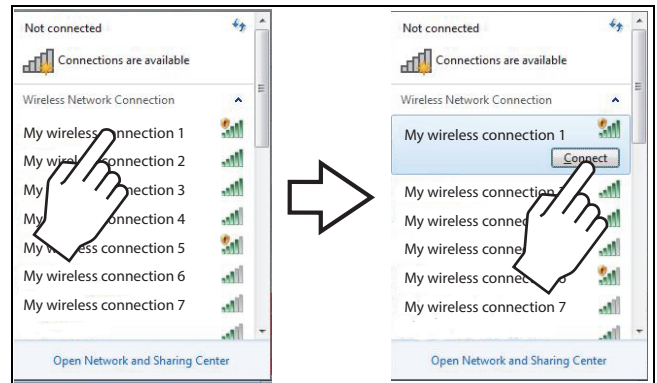

1. Turn on the diagnostic tool and allow Windows to bootup, then allow the ShopStream Diagnostic Suite software to open.

After bootup if Wi-Fi is not automatically connected you will notice the Wi-Fi icon in the System Tray (lower right side) is gray with an amber colored star (this indicates Wi-Fi is not connected (shown below)).

2. To connect to a network, click the Wi-Fi icon in the System Tray.

The wireless network connection window opens (shown below).

3. Choose your **Wireless Network** from the list of available networks, then select **Connect**.

Note: *A password is required when choosing a protected network.*

A wireless network connection progress window displays as the connection is being made.

4. After the connection is successfully made, the Wi-Fi icon in the System Tray will display as Connected (shown below).

The diagnostic tool is now connected to the Wi-Fi network.

Note: *Wi-Fi performance varies depending on your wireless network equipment and ISP.*
